
TABLE OF CONTENTS

Module 1: Introduction
1 Course Guide
2 Anatomy of an emergency call
Module 2: The Ambulance Service
1 Response to a 999 call
2 Roles within the ambulance service
Module 3: Communication
1 Principles of communication
2 Practical communication
Module 4: Legal, Ethical and Professional Issues
1 Being a healthcare professional
2 Consent and capacity
3 Confidentiality
4 Equality and diversity
5 Safeguarding adults and children
Module 5: Health and Safety
1 Health and safety policies and legislation
2 Risk assessment
3 Infection prevention and control
4 Fire safety
5 Stress
Module 6: Manual handling
1 Musculoskeletal anatomy and physiology
2 Principles of manual handling
3 Moving and handling equipment and techniques
Module 7: Scene Assessment
1 Scene assessment and safety
2 Major incidents
3 Hazardous materials
Module 8: Patient Assessment
1 Patient assessment process
Module 9: Airway
1 Airway anatomy
2 Managing the airway
3 Tracheostomies
4 Choking in adults
5 Choking in the paediatric patient
Module 10: Breathing
1 Respiratory system physiology
2 Using medical gases safely
3 Assessment of breathing
4 Common respiratory conditions
Module 11: Circulation
1 Cardiovascular system anatomy and physiology
2 Assessment of circulation
3 Common cardiovascular conditions
Module 12: Disability
1 Nervous system anatomy and physiology
2 Assessment of disability
3 Disorders of the nervous system
Module 13: Exposure Environment
1 Extremes of temperature
2 Drowning
Module 14: Medical Emergencies
1 Anaphylaxis
2 Diabetes
3 Sepsis
Module 15: Trauma
1 Mechanism of injury
2 Integumentary system anatomy and physiology
3 Wounds and bleeding
4 Assessment and management of the trauma patient
5 Skeletal immobilisation
6 Burns
Module 16: Assisting the Paramedic
1 Assisting the paramedic – Airway
2 Assisting the paramedic – Drug
Module 17: Obstetrics
1 Complications in pregnancy
2 Normal childbirth
3 Childbirth complications
4 Newborn life support
Module 18: Children and Infants
1 Why paediatric patients are different
2 Initial assessment and management of the paediatric patient
Module 19: Older People
1 Ageing
2 Dementia
Module 20: Cardiac Arrest
1 Adult basic life support
2 Paediatric basic life support
3 Defibrillation
4 Cardiac arrest in special circumstances
5 Post-resuscitation care
6 Cardiac arrest decisions
