

PARAMEDIC: AIRWAY MANAGEMENT

- Airway management and ventilation are the highest priorities in patient management and always the first things to be considered when treating an emergency patient
- This is a comprehensive stand-alone program, which meets and exceeds the airway management objectives as outlined in the 1998 U.S. Department of Transportation Paramedic National Standard Curriculum
- Written by a paramedic for paramedics, this book uses a case-based approach to help future paramedics develop analytical skills, whilst learning the content of airway management
- Published in 2004 with 332 pages, paperback
