“Everything you need in an emergency”
DO SP PRICES INCLUDE VAT?
SP prices do not include VAT. If you are an individual or an organisation that is required to pay VAT do not forget to add this amount to your order at the current rate. Please do not add VAT to the cost of any books ordered as these are currently zero rated*. The rate of VAT is currently 20%.

*Information is correct as of 01/01/2016 but is subject to any changes made by the UK government.

CAN I OPEN A CREDIT ACCOUNT?
SP will open accounts for established UK businesses and organisations, subject to receipt of a satisfactory credit rating. Unfortunately we cannot offer credit accounts to individuals. Credit account application form on page 353

WHEN WILL I RECEIVE MY ORDER?
SP will usually aim to despatch any UK orders that are made before 3.00pm and held in stock on that same day. Your receipt of the order will usually be within 2-3 working days. UK overnight delivery is also available at a small additional cost.

CAN I ORDER ON THE INTERNET?
SP has an online brochure at www.spservices.co.uk Credit card orders can be placed online using our secure shopping cart facility. Account customers can also use our online ordering facility.

HOW WILL MY ORDER BE DELIVERED?
SP prides itself on its quality of service, orders are despatched quickly and efficiently in robust packaging. SP only use the most reliable delivery despatch services available, utilising signed proof of delivery and computerised tracking on every parcel.

CAN I ORDER IN PERSON?
Yes! We have a fully stocked showroom at our Bastion House HQ in Telford. You’re welcome to visit during normal opening hours.

Leasing Capital Equipment with SP Services

Purchasing high value items such as Defibrillators, ECG Monitors, Furniture and SPO2 Monitors can put a big hole in anyone’s finances. Thankfully, we can make it easier.

As long as the equipment you require is over £1000, you can have the cost broken down into small, manageable chunks which will be collected from you via a monthly direct debit*. Once it’s set up you don’t have to worry about it again. We’re hoping that this scheme will help you, our customers, make your money go further!

Benefits for you
- Flexible payment schemes to suit your business requirements
- No major upfront costs
- Spread the cost over 3 or 5 years
- Improved productivity through the purchase of the latest equipment
- Quick response times enabling you to have the equipment ASAP
- Fixed and regular payments collected by Direct Debit
- Existing credit such as bank loans and overdrafts are not affected
- Leasing payments are 100% tax deductible against company profits

Call our customer services line on 01952 288 999 or visit our web site for more information

www.spservices.co.uk/leasing

* not available to private individuals or sole traders
www.spservices.co.uk

The SP web site keeps you up to date with the very latest products and special offers, 24 hours a day, 7 days a week.

- One click buy
- Earn SP Loyalty Points as you shop
- Updated on a daily basis
- Features even more products than this catalogue
- Integrated secure shopping cart with a new improved payment gateway
- Web user accounts allow you to track the progress of your order
- Regularly updated with Special Offers and New Products
- Advanced search engine makes finding the product you need a breeze
- Swift, safe and secure online ordering from the comfort of your chair
- Downloadable data sheets and extra product information

MOBILE

Shopping with SP has never been easier

You can now shop on the move with SP Services’ new mobile site. Everything you could want from the full SP website streamlined to be easily read on mobile devices and tablets.

You can even scan the QR codes in this catalogue and go straight to the product online for extra information, more pictures or direct, one click ordering.

CHAT WITH US LIVE

Browsing our web site and have a question or having trouble completing your order?

You can now chat with us live right from your computer. Just click on the “CHAT WITH US LIVE” banner and you’ll be put through to one of our advisers.

Our in-house team of experts can help with any technical problems you may have when browsing the site and can advise you on product specifications if you can’t find the answer you want online.

Online chat is normally available during regular office hours.

Relipad Xtreme Advanced Sterile Low Adherent Dressing Pads

The Relipad Xtreme dressing has a wound contact layer on both sides, allowing for correct application in low light conditions. The hexagonal design of the wound contact layer helps prevent strike through to the back of the dressing.

- Advanced wound contact layer
- Low-adherence technology
- Hi-tech hexagonal mesh
- Fluid flows in one direction only
- Absorbs up to 10 times its own weight
- Retains fibre integrity when cut
- For use on lacerations, minor burns, grazes and as a post-operative dressing

**TyTek Trauma Bandage**

- Sterile, non-stick pad suitable for applying immediate pressure to wounds
- Easy-open white tear notches for easy ID and quick access
- Intermittent velcro prevents trauma bandage from unrolling during application
- Integrated clips at the end of the bandage to easily secure the pressure dressing to the patient
- Eliminating the need for separate gauze pads and elastic wraps
- Simple, quick, controlled and effective pressure dressing system
- Vacuum sealed to minimize cubic space

**TyTek EZ Vacuum Gauze with Dispenser**

- This compressed gauze is superior to typical rolled gauze
- The unique folding and dispensing system makes the compressed gauze the ideal solution for fast and easy wound packing
- In prehospital emergency care scenarios, rolled gauze can become damaged and lose its sterility
- TyTek Medical’s compressed gauze maintains sterility in rugged, compact packaging that facilitates wound packing and wound dressing
- In wound packing situations, gauze removal from the wound tract is made easier because EZ-Gauze is a continuous-feed gauze
- It is removed in a single continuous piece, as opposed to removing an unknown number of 4x4 gauze pads from the wound
- 3.75m, 6-ply, 11.5cm sterile compressed gauze
- Vacuum sealed for maximum portability and minimal cubic size

T4 & T6 Trauma Wound Dressing Pad

SP’s T4 and T6 trauma wound dressings are designed to treat every possible bleeding wound. The dressings are sterile, non-adherent and are easily wrapped and secured.

- Trauma dressing with heavy duty bandage
- Available in two sizes (T4 and T6), the T Series trauma dressings have been designed for use in extreme conditions
- Double bagged packaging for extra protection
- Inner bag is vacuum packed to reduce storage space
- Provides immediate direct pressure to the wound
- Quick and easy to use
- Absorbent high quality dressing pad
- Secure fastening, no need for safety pins or tape
- Single use
- Sterile
- Supplied in an easy to open waterproof poly bag

Trauma Fix Military Dressing

- TraumaFix is a substantial, highly absorbent dressing pad, capable of absorbing over ten times its own weight in fluid.
- A pressure bandage allows direct pressure to be applied quickly and maintained easily, this is secured instantly with a velcro style fastening.
- Multiple major bleed injuries can be stemmed quickly, allowing the casualty to be moved easily.
- The dressing is a significant advance in the treatment of trauma injuries.
- Highly absorbent non-adherent wound pad.
- High pressure bandage.
- Super-fast application, quick-fix velcro style fastening.
- Sterile.

Blast Bandage

- The Blast Bandage was designed to provide the ability to quickly package traumatic amputations, burns and large pattern wounds with minimal use of supplies and minimal effort.
- Provides a 50 x 50cm treatment area but packs to the size of a 10cm combat bandage.
- Large non-adherent wound pad can be easily wrapped around limbs and secured with the attached elastic wrap.
- Large enough to cover the entire back or chest of most casualties.
- A removable occlusive layer will cover a 48 x 48cm area or can be used to cover abdominal contents minimizing the loss of heat and moisture.
- The ‘brakes’ are especially helpful during the dressing of amputations, providing multiple points of adhesion preventing slippage of the elastic during the rapping process.

<C> ABC Trauma & Gunshot Wound First Aid Pack

- Survivability of trauma wounds has undergone an unprecedented revolution. People are surviving catastrophic injuries which, only a few years back, would have been fatal.
- <C> ABC is the military’s highly-successful “catastrophic haemorrhage first” updating of the traditional ABC of Airway, Breathing, Circulation first aid treatment priorities.
- Unique ‘Use or Discard’ implementation of <C> ABC - where every item acts as a step-by-step aide memoire.
- Compartmentalized Task Focus - avoids distractions from the immediate task.
- Wearable ‘there when you need it’ design - because time is everything in trauma injury and big kits get left in the car
- Specific to Time-Critical : Life-Threatening situations - you don’t want to be distracted with sticking plasters or non-essential items when dealing with Trauma injury
- Key items are the same as UK/NATO military issue - so you can be confident you have the best equipment and are compliant with de facto UK standards.

Chito-SAM 100 Haemostatic Dressing

- Chito-SAM 100 is a high performance 100% pure chitosan haemostatic dressing designed to stop lethal bleeding fast
- It is easy to use, extremely effective, and safe
- Works independently of the body’s normal clotting processes
- The haemostatic performance is extremely effective compared to products impregnated or coated with chitosan haemostatic agents
- Achieves haemostasis 3x faster than competitors in in-vitro clotting tests
- Unlike most haemostatic dressings, Chito-SAM 100 is made of non-woven, 100% pure chitosan
- Independent tests have shown it to perform 25% better than a leading chitosan gauze
- With this increased efficacy, you can use less gauze to achieve the same haemostatic result
- In addition, our unique ‘tear anywhere’ packaging allows quick access to the product for fast application
- ‘On the battlefield, haemorrhage from wounds remains the leading cause of mortality, accounting for 50% of all deaths. Haemorrhage is also the second leading cause of mortality among injured civilians, accounting for 39% of civilian trauma deaths.’

</table>
Haemorrhage or bleeding remains a main cause of preventable death amongst trauma victims and responsible for 30 to 40% of all trauma deaths. Out of these deaths, up to half occur before even reaching hospital. To add to the problem, in the severe trauma cases, the blood no longer clots normally, due to the body cooling or the shock reaction to the injury.

Celox haemostats stop life threatening bleeding, using a unique chitosan formulation which does not depend on the body’s clotting system and does not generate any heat. Celox granules have been shown to work on the most challenging cases: hypothermic (cool) blood and blood containing anticoagulants such as heparin. Celox is easily cleaned and removed when the patient reaches surgery and because there are no minerals, residual chitosan material can be metabolised.

How it works

Celox chitosan is made from refined shrimp shell. On contact with fluid, chitosan absorbs fluid, swells and forms an adhesive gel which sticks to tissue around the injury. Celox electrostatically attracts red blood cells to form a plug. Celox chitosan does not interact with the body’s clotting mechanism and is equally effective if the body’s clotting mechanism is not working due to trauma (hypothermia).

- Chitosan absorbs blood fluid, swells and forms a gel
- Celox™ forms a gel-like plug that stops the bleeding
- Does not rely on the body’s own clotting mechanism
- No heat is generated

**CELOX Haemostatic Granules (15g)**

- The original first generation Celox haemostat in 15 gram sachet
- Moulds to irregular wound shapes
- Easy to use
- Significantly reduces blood loss
- Safe to use for the entire body including, head, neck and chest wounds
- Suitable for the military, first responders, hospitals, industrial first aid, emergency services, wilderness medicine, adventure pursuits, professional and amateur sports

**Foxseal Chest Seal**

- Foxseal TM is a pioneering occlusive dressing for the treatment of open chest wounds as a tool in prevention of pneumothorax.
- Two seals per pack allow entry and exit wounds to be treated.
- Patient monitoring is vital in these injury types and the design is a simple valve-free option, for simple use. The chest can be vented with the easily-gripped tab and the adhesive re-seals.
- Treats injuries up to 15cm maximum length
- Provides dependable adhesion in the most challenging situations.

**CODE** | **ITEM** | **PRICE**

**CELOX Rapid Gauze**

- The latest haemostatic technology with unique Chito-R augmented chitosan giving faster emergency treatment in critical life threatening situations.
- Works with just 60 seconds
- Stops life threatening bleeding fast
- Reduces blood loss by 60%
- Stops hypothermic bleeding as found in severe traumatic injuries
- No minerals, chitosan is made up of glucosamine and N-acetyl glucosamine
- CeloxTM Rapid is Nonallergenic and no heat is generated

**CELOX Gauze**

- The proven and effective haemostatic gauze
- Used in the most challenging environments when rapid control of severe bleeding is required
- Compact design, just 14mm thick and 34g in weight allows multiple packs to be carried and makes for easier handling and reduces application time
- The sole Haemostat of choice for the UK MOD
- Highest observed survival in US DoD testing.
- Used in pre-hospital and by emergency responders around the world

BS-8599-1 First Aid Kits

BS 8599-1 Compliant Workplace First Aid Kits

- All our first aid kits meet the current approved BS 8599-1 Standard
- Fully updated to modern needs - contains a more comprehensive inventory than ever before
- Supplied in a robust green polypropylene case
- Includes a wall mounting bracket as standard
- Personalisation service available for large orders
- Available in four sizes depending on your individual needs
- Cost effective refill kits are available

What size BS 8599-1 first aid kit do you need?
Employers are required to make a risk assessment to decide what the hazard levels are and how many employees are involved in the area to be covered. This is a useful guide to help match this risk assessment to an appropriate size or kit.

<table>

  - Price: £44.95

**Prices exclude VAT and Carriage - Standard terms and conditions apply**
The Morgan Lens Single Pack

- The Morgan lens delivers immediate continuous irrigation to injured eyes. In short, it saves sight. It also saves time, by freeing up your hands to attend other injuries
- A ‘hands-free’ method of irrigation
- It is widely used by physicians, nurses and other medical personnel for emergency eye irrigation
- In seconds, the eye can be receiving the lavage necessary to treat chemical and thermal burns or to remove non-embedded foreign materials in the eye
- The patient may then be comfortably transported while one or both eyes receive the most complete and comfortable ocular irrigation possible
- Saves time, saves trouble and saves eyes

Eye Care Pod Station with Mirror

- 8 x Sterile saline eye wash pods 20ml
- 2 x No 16 eye pads

Fire Blankets & Heat Shields

- We know that a minor burn can strike at any time, therefore we’ve made it easy to carry relief with you, all of the time
- Unlike petroleum products which can trap heat in the skin, water based burn gel EU actually draws the heat out of the burn and begins dissipating it on contact
- Liquid gel squirted direct onto burn
- Immediately cools and soothes
- Helps prevent infection
- Available in 50ml and 120ml squeeze bottles and 4g sachets

**First Aid/Hygiene**

Prices exclude VAT and Carriage - Standard terms and conditions apply
BURNSHIELD, when applied to burn wounds, preferably as soon as possible after the burn, has the tremendous ability to absorb and dissipate heat, providing relief, minimising shock and skin damage, halting the burn process and physically protects against further contamination. BURNSHIELD’s cooling and soothing effect results from its specially formulated Hydrogel which is non-toxic and non-irritant.

The active ingredient is Melaleuca alternifolia. The sterile dressing keeps the wound clean while the loss of body fluids is kept to a minimum.

BURNSHIELD facilitates removal of burnt clothing. Easy to apply, non-adhesive and easy to remove without further trauma to the patient, allowing for quick medical diagnosis. Safe for use on children.

BURNSHIELD can be used as an emergency dressing for superficial to full thickness burns. Any burn, whether received from open flames, scalding from hot water, steam, gas, chemicals or electrical appliances can be treated immediately with BURNSHIELD®.

### Burnshield Trauma Burn Dressings

- Sterile trauma burn dressing
- Simple to apply and remove without any discomfort
- Open cell foam dressings, individually packaged and easy to open
- Contains hydrogel, minimises trauma
- The packet for BU/092 can also be used as an emergency burn bag - used in conjunction with the dressing
- Simple to use - no special training required
- Provides instant cooling and pain relief
- Provides physical protection from inflammation
- Safe for use on children
- The dressing is non adherent and non toxic
- Ideal for pre-hospital burns care

Physicool Cooling Bandage

- Physicool is currently being used within the NHS, private hospitals, private practices and by healthcare professionals to reduce pain, swelling and inflammation across a wide range of applications.
- Manufactured using an open-cell weave which acts as the conduit for the Coolant and offers 2 to 3 hours of cooling before it will dry-out.
- Due to the initial success achieved post-total knee arthroplasty (Garrett, 2012); Physicool is now being used to enhance patient rehabilitation post-operatively across all body parts, traumas and joints.
- Lasts for up to 2 hours.
- Helps speed up healing.
- No refrigeration necessary.
- Can be re-used.
- As seen on BBC’s Dragons Den.

The SP Ice Pack gives essential fast and effective cold treatment for various tendon injuries, inflammation, knocks, sprains, strains, bruises and swellings.

This product has proved to be a great success and is especially popular with sports men and women, for the immediate treatment of sporting injuries such as sprains, strains, bumps and bruises. However, physiotherapy and first aid treatment for burns and scalds are other uses for which the SP Ice Pack has proved very successful.

Instant Ice Packs are multipurpose instant cold therapy packs with benefits to the Sports, Veterinary, Equine, Leisure, General Domestic and Industrial Markets.

The pack measures 300 x 135mm and does not require refrigeration. It does not cause freeze burns and can be applied directly to the body.

To activate the pack, simply squeeze the inner sachet until it bursts, then allow the chemicals to mix. Within seconds the contents react to produce an ice-like composition with a temperature of around freezing point.

The SP Ice Pack is currently being used by several county ambulance services, all areas of the Sports Industry, Veterinary, Equine and many other fields.

The pack can be disposed as household waste.

- Instant cold compress for sport injuries, physiotherapists & any emergency treatment
- Available for use instantly, no refrigeration required
- Simply squeeze pack to activate
- Produces an ice like composition with temperatures around freezing point
- Can be applied directly to the body
- Does not leave freeze burns on patient
- Used packs can be disposed of as household waste
- Measures 300 x 135mm

- 150ml

**P.O.M = Prescription Only Medicine - Restricted Sale**
SP Services, as a licenced pharmaceutical wholesaler, require by law all orders for prescription only medicines (POMs) to be signed by a registered medical practitioner. The delegating doctor may be resident, visiting or consulting, but his authority needs to be written with the status of the prescriber to be verified by SP Services. A POM form must be completed before any prescription only medicines will be supplied.

**Pharmacy = Pharmaceutical Medicine - Restricted Sale**
Pharmacy items are restricted - please contact us on 01952 288 999 for further information.
SP Alcohol Hand Rub

- Hand washing is the single most important activity for preventing cross-infection in all working environments
- SP Alcohol hand rub comes in two convenient sizes and includes are hydrating system that protects the skin from dryness and irritation while offering protection against antimicrobial activity
- Effective, easily accessible and user-friendly
- Our 500ml bell container sits conveniently on a locker or trolley top
- We also offer the Belt Bottle, a handy individual pack that will clip on to a pocket, belt or directly onto greens.

**Price:** £32.95

**CL/066 Bioguard Surgical Hand Gel - 250ml Tube**

**Price:** £2.95

### Sterillium Rub-In Hand Disinfectant

- Sterillium is a fast acting antimicrobial gel with a wide spectrum of uses
- Application is simple, economic and requires less time than traditional hand washing procedures with soap and water
- Can be used in all areas of the first aid room, hospital or clinic, including wards and operating theatres
- Sterillium has high skin tolerance and, as natural skin oils are not rinsed off, skin integrity is therefore preserved. This is very important as potential infection

**CL/093 Sterillium Rub-In Hand Disinfectant**

**Price:** £3.95

### Sterile Moist Wound Cleansing Wipes

- Individually wrapped, alcohol free moist wipes
- Available in 10’s or boxes of 100 sachets
- Wipes saturated with a solution containing 0.9% sodium chloride

**CL/010 SP Sterile Wound Moist Cleansing Wipes - 100 Sachet Box**

**Price:** £4.25

**CL/011 SP Sterile Moist Wound Cleansing Wipes - 10 Sachet Box**

**Price:** £0.55

### Vernacare Senset

- A gentle soap-free foam designed for cleansing sore and sensitive skins which are at risk from damage
- Contains emollient/moisturisers to prevent drying which reduces the risk of cracking and soreness
- Includes patient label to write patient name and ward details on to help reduce the risk of cross infection
- Uses a dual actuator nozzle to give better control when applying to a patient
- Contains a deodorant
- Water-repellant - has ‘easy spread’ characteristics
- pH balanced

**CL/081 Vernacare Senset Cleansing Foam - 300ml**

**Price:** £5.60
Clinell Universal Disinfectant Wipes

## Chemical Spills Poster
- Spills of high-risk body fluids present a serious hazard to the staff who are delegated to mop up the spill and disinfect the affected area
- Haz-Tab granules will absorb the spill, thus safely containing it and releasing a minimum of 10,000 p.p.m available chlorine to disinfect the area
- Made from NaDCC, a powerful and effective chlorine producing agent, which has been shown to be a more efficient disinfecting agent for blood and body fluids than hypochlorite

Biohazard Spills Kit

- For hospital wards, departments, laboratories, clinics or doctors’ surgeries a sudden and unexpected spillage of blood or any other body fluid, is as distressing as it is dangerous
- Using the Guest Biohazard Spills Kit the hazard can be dealt with quickly, efficiently and above all safely
- Guest Biohazard Spill Kits and Spill-Pak are designed to enable staff to conform to the recommendations of the Department of Health for the safe collection and disposal of blood and body fluid spill
- The large kit is ideal for locations where spills often occur such as A&E, Surgical Wards, Pathology Reception Areas, etc
- Also available in Medium sized kit for those areas where spills happen less frequently, this kit with its smaller capacity may be more appropriate
- CL/084 Case Dimensions: 25.5 x 21 x 15.5cm
- CL/085 Case Dimensions: 31.5 x 21 x 19cm

Urine and Vomit Spills Kit

- The Guest Urine & Vomit Spills Kit is more acceptable toward staff dealing with spills because it is not chlorine based which otherwise can give off unpleasant smells
- The NQ64 granules are a special blend of absorbents and deodorising fragrance granules, combined with a quaternary compound that is effective against a broad spectrum of bacteria
- This unique granular formulation, when used as part of the full kit makes dealing with urine or vomit spills a simple task that can be completed with a minimum of training or supervision
- This kit is particularly applicable in Nursing Homes, Geriatric Wards, Hospices, Doctors Surgeries and Schools
- Contents:
  - 6 x Shakers NQ64 disinfection granules
  - 15 x Scoops & scrapers
  - 1 x Tub surface Wipes
  - 30 x Latex protective gloves
  - 15 x Yellow clinical waste disposal Bags
  - 15 x Disposable aprons

Mercury Spill Kit

- This simple but effective kit enables staff to deal safely and easily with mercury spills with a minimum amount of training required
- The kit contains everything that will be needed with the exception of a mercury vapour protection respirator (as recommended in the HSC procedure), which is available separately
- Contents:
  - 2x Disposal units
  - 2x Mercury aspirator (syringe)
  - Scrapers
  - Amalgamating powder
  - Collection sponges
  - Protective aprons
  - Protective nitrile
  - Mercury Spill Warning Card
  - Dampening Spray
  - Warning tape
  - Full instructions for use

# 64 Respirator Masks

## BioMask Anti Infection Face Masks

BioFriend’s revolutionary, patented technology traps and kills bacteria and viruses on contact and allows you to breathe normally:

- Traps and kills 99.9% of harmful germs
- Superior breathability & comfort
- Self-sanitizing for all-day wear
- Reduces cross-contamination of hands and surfaces
- Kills germs including those that cause Influenza A, Swine Flu, Bird Flu, common colds, measles, MRSA, pneumonia and SARS.
- BioFriend traps microbes by mimicking the sites on human cells to which they normally attach, then, destroys them by disrupting their surfaces (viruses) or cell walls (bacteria).
- Visit www.spservices.co.uk/biomask for more details

Prices exclude VAT and Carriage - Standard terms and conditions apply
Non-Sterile Powder Free Latex Gloves - White

- Quality latex, disposable examination gloves
- Non-sterile
- Box of 100 in 4 sizes or a large pair
- These gloves contain no powder
- Textured feel
- Designed with EMS personnel in mind
- Quantity discounts available
- Acceptable Quality Level 1.5
- White colour

Non-Sterile Powder Free Nitrile Gloves - Pink

- These pink nitrile non-sterile gloves are powder free and for single use
- The gloves are ambidextrous with a beaded cuff and textured surface at the fingers
- The gloves are a suitable alternative for areas where a patient or health worker is latex sensitised
- These gloves are also recommended for high risk procedures where there maybe contact with bodily fluids or chemicals
- Pink colour
Non-Sterile Powder Free Nitrile Gloves - Purple

- Halyard Powder free Nitrile Gloves safeguard EMS employees from exposure to bloodbourne pathogens and other infectious materials whatever the task or procedure
- Quality, single use, ambidextrous, powder free, latex free, purple nitrile gloves
- Unique purple colour provides quick, visual differentiation from latex and other synthetic gloves
- Custom design enhances comfort and fit
- Permeation resistant to ten chemotherapy drugs and 4% glutaraldehyde, offering superior chemical protection
- Thinner gauge improves tactile sensitivity
- Textured fingertips enhance wet & dry grip
- Available in 24cm standard & 30cm long cuff lengths
- This product demonstrates reduced potential for sensitising users to chemical additives which reduce the risk of irritant or allergic contact dermatitis (Type IV)
- Non-detectable levels of chemical allergens, reducing the potential for irritation and Type IV hypersensitivity
- Latex free - primary material is acrylonitrile - butadiene eliminating the potential for Type I allergic reactions to latex proteins
- Beaded cuff
- Purple colour
- Meets or exceeds an AQL of 1.5

• The perfect solution for hospitals and health centres to keep heat sensitive medicines between 2-8°C
• Internal fan to equalize cabinet temperature and avoid frost formation on the evaporators fin
• Absorption cooling system that results in the noiseless running, meaning the fridge can be situated in any environment without causing disturbance
• Interior draw fronts
• Door alarm sounds after 20 seconds to alert user that door is still open, reducing chances of increased internal temperature

• Rescue Original bags are supplied in either tough waterproof 1100 denier PAX-Dura or PAX-Plan materials
• Designed and developed by EMS professionals
• Some the most stylish, best constructed and desirable range of portable medical kits available

PAX-Dura fabrics are made of is an extremely robust polyamide fiber with a very high yarn density per square centimeter giving a the high tensile strength and abrasion resistance. PAX-Dura is also teflon impregnated to aid in dirt resistance.

PAX-Plan is very easy to clean. Manufactured from a polyester thread that has been PVC coated and lacquered, PAX-Plan bags offer excellent waterproof qualities and excellent cleaning and disinfecting conditions - essential where cross infection risks are present.

• Red waterproof Nylon
• Contains two Velcro™ removable see-through pockets
• Loop and bands for storage of essential items
• Ideal for car, home, sports or caravan
• First Aid sign included
• Small padded carry case measures 25 x 20 x 10cm

Littmann Classic III

- The Classic III Stethoscope brings new design, materials, and technology to the Littmann stethoscope series that’s been used and trusted by medical professionals for decades. With a two-sided chest piece, dual tuneable diaphragms, improved tubing, and much more, the Classic III stethoscope combines the best of new and traditional.
- High acoustic sensitivity when performing general physical assessment
- Tuneable diaphragms on both the adult and paediatric sides of the chestpiece
- Single-piece diaphragm that’s easy to attach and easy to clean because the surface is smooth and without crevices
- Open bell versatility allows the paediatric side to convert to a traditional open bell by replacing the single-piece diaphragm with a non-chill sleeve
- Next-generation tubing with improved resistance to skin oils and alcohol for longer tubing life - less likely to pick up stains
- Chestpiece is precision-machined into an aesthetically pleasing, less angular shape, the stem features an open side indicator
- Classic III stethoscope includes a 5 year warranty

3M Littmann Cardiology IV Stethoscope

• The very latest in the standard for dual head cardiology technology
• Improved high frequency acoustics - the all new design allows greater access to high frequency heart sounds
• Unique diaphragm designs - newly designed, fully optimised, adult and paediatric diaphragm offers a full range of auscultation sounds
• Next generation long life tubing for greater longevity with a double lumen (two tubes in one) design to minimise external friction sounds
• Single piece diaphragm technology - easier to clean than ever before, providing greater infection control properties
• Spare parts kit included - spare small soft sealing eartips, large firm grey eartips, and non chill bell sleeve are included as standard
• Double-sided large/small chest piece for both adult and paediatric assessment
• Total Length: 68.5cm / 27"

Littmann 3100 Electronic Stethoscope

- State-of-the-art sound sensor provides a life-like high-end cardiology stethoscope sound experience
- Ambient Noise Reduction technology reduces, on average, 85% of ambient background noise
- Frictional noise reduction technology helps you focus more on what you need to hear
- 24X sound amplification compared to the best mechanical Littmann stethoscope
- Looks, feels and weighs like a traditional Littmann stethoscope; can be draped over the neck or folded into a pocket
- LCD user interface with easy to operate controls, battery level indicator and heart rate monitor
- Worry-free power system, operates on a single AA battery with a tool-free battery compartment, with multiple reminders when battery life is low
- Auto-on feature; once on the unit stays in battery-saving ‘sleep mode’ until you start your next auscultation
- 15mm diameter sound sensor means that you can auscultate patients of all sizes, including children and adults.
- The solid metal chestpiece and rugged design offers years of trouble-free operation
- 2 year warranty
- 68cm (26in)

Littmann 3200 Electronic Stethoscope

- Records and stores 12 separate sound tracks for use on multiple patients and positions
- This stethoscope reduces background noise by 85% while still allowing you to hear the critical body sounds you need to hear
- Snap Tight Soft-Sealing Eartips provide a comfortable fit and a tighter seal from ambient noise entering through eartip connections
- State-of-the-art sound sensor provides a life-like 3M Littmann sound experience similar to a high-end cardiology stethoscope
- Frictional noise reduction technology helps reduce handling noises compared to earlier stethoscopes
- Up to 24X sound amplification; may be helpful when a heart, lung or body sound is especially faint; when a patient is obese; or when a patient’s clothing restricts your listening experience.
- Record heart sounds and transmit them to your PC for real-time analysis
- Easy to operate - the menu button brings you to screen-guided commands to operate recording and Bluetooth features
- Includes Zargis software and Bluetooth dongle
- Lightweight and comfortable to use - is about the same weight as a cardiology-grade acoustic stethoscope
- 2 years warranty
- 69cm (27in)

Professional Stethoscope

- High quality stainless steel
- Dual head stethoscope
- Single tube sensitive design
- Innovative design
- Optimum acoustic performance
- Durable chest piece
- Non-chill rings and diaphragm rings made from hypo-allergenic insulating polymer

Pinard Foetal Stethoscope

- Designed for superior auscultation of the foetal heart
- Chrome-plated brass binaural and stem
- The 22inch/55cm black tubing can be easily shortened to facilitate use of the headrest
- High acoustic sensitivity
- High quality single lumen tubing
- Compact and durable design

S3 Stat Stethoscope Tape Securing Device

Up until now, the easiest way to keep a roll of medical tape handy was to have it dangling on the earpiece of your stethoscope. As a professional in the medical field you have enough to keep you busy without having to worry about manually pushing the roll of tape down every time you want to use your stethoscope.

- Keeps a roll of 2.5cm medical tape secured to the bottom portion of the stethoscope earpiece
- Allows tape to turn easily for rapid tape removal
- Keeps tape easily accessible

Pinard Foetal Stethoscope

- Designed for superior auscultation of the foetal heart
- Chrome-plated brass binaural and stem
- The 22inch/55cm black tubing can be easily shortened to facilitate use of the headrest
- High acoustic sensitivity
- High quality single lumen tubing
- Compact and durable design

**Urine Analysis Strips**

- Simple to use, urine diagnostic reagent strips
- Tests for 10 parameters
- Strips are not air activated therefore last full shelf life
- Suitable for use by medical professionals and for users at home
- Provide early indications of developing health problems and identify potential abnormal functions requiring more extensive testing
- Routine use is frequently recommended for monitoring certain existing and chronic health conditions
- The reagent pads react with the sample urine to provide a visible color reaction within 30 seconds to one minute depending on the specific panel screen
- Tests for URS-K (Ketones) URS-3 (Glucose, Protein, pH) and URS-10 (Glucose, Protein pH, Leukocytes, Nitrites, Ketones, Bilirubin, Blood, Urobilinogen, and Specific Gravity)
- 10 Parameter - Pack of 100

- Free batteries for the life of the product
- All models come complete with carry case & test strips
- Includes a Softclix™ 2 lancing device for virtually pain free testing (not for multiple patient use)
- **ACCU-CHEK AVIVA**
  - Dependable worry-free testing
  - Results in just 5 seconds
  - Turns on automatically when the strip is inserted
  - Large test memory with date and time
  - Test results can be downloaded
  - Free batteries for the life of the product
  - All models come complete with carry case & test strips
- **TRUEresult Twist Blood Glucose Meter**
  - The TRUEresult Twist glucose meter is ideal for quick and easy results on the go
  - The blood test meter is very small and fits onto the top of the test strips pot which can make blood testing more simple, particularly if you’re travelling, shopping or dining out
  - No Coding - eliminates a step that can lead to inaccurate results
  - Simple and fast use, as it only requires a 0.5 microlitre sample size with results taking just 4 seconds
  - You can set up 4 testing reminders and the ketone alarm will warn you when blood sugar rises above a certain level
  - Easy-to-Read Display - for easy viewing of test results
  - Memory capacity: 500 tests
  - Strip Release Button - eliminates handling of strips after testing
  - The TRUEresult twist exceeds the ISO minimum criteria for accuracy with 100% of the results within ISO limits
  - Lifetime warranty

Accutrend Plus System Kits

- A flexible, hand-held device for the diagnosis of the main risk factors of cardiovascular diseases (CVD) and lactate
- Can be used outside the lab, suitable for home or recreational activity use
- Results are provided directly from capillary blood.
- Tests for total cholesterol, triglycerides, blood glucose & lactate
- Built-in automatic performance and meter self-testing
- Easy to use
- Up to 50 glucose values & up to 15 cholesterol values can be stored with date and time of measurements

Accutrend Plus System Kit - Full Starter Kit
- Includes: Cholesterol test strips (25), Glucose testing strips (50), Triglyceride testing strips (25) & Lactate Testing Strips (25)

Accutrend Plus System Kit - Cholesterol & Glucose
- Includes: Cholesterol test strips (25) & Glucose testing strips (50)

SP30M Hand Held Pulse Oximeter with Adult Probe

- The SP30M is very easy to use, yet full of features with simple menu selection buttons
- At-a-glance analysis of SpO2 and Pulse Rate
- Portable, compact and reliable and can be widely applied to a clinical environment, hospital use, medical first aid departments or serious home use
- Can continuously monitor, spot check, replay the data in real time, and display SpO2 plethysmograph
- High resolution large 2.8” TFT screen displays SpO2, PR, waveform and pulse bar
- Adjustable audible and visual alarms - Bright coloured alarm lamp on front of unit, separate from the screen
- Very easy to use menu system for adjusting settings and features
- Battery-low indicator
- Adjustable backlight
- Automatic power-off function
- Lock function to prevent keys from being accidentally pressed
- Robust attachment for sensors to main unit, prevents accidental removal of cable
- Lock prevents unauthorised removal of batteries
- Allows 127 different patient IDs
- 72-hour data storage and review
- The large built-in screen allows you to review the recent results as well as instantly view average SpO2 and PR
- Even on-screen graphs are easy and clear to display
- Audible alarm suppression - can be silenced for 2 minutes
- MedView software & USB cable/Bluetooth connectivity for further data analysis on a PC
- Supplied with 3 AA alkaline batteries
- Supplied with reusable adult finger sensor probe
- SpO2 Range 70%-100%

BCI Spectro2 10 Pulse Oximeter with Adult Finger Probe

- The BCI SPECTRO2 10 leads the way with one of the largest displays on the market, durable construction, and easy one-handed operation. It is ideally suited for spot-checking in home care, primary care, emergency & transport settings & other clinical environments, as well as during sleep screening or walk tests
- It’ll even store at least 144 hours of trend data for a combination of all 99 available patient record numbers.
- Large, bright, easy-to-read LED for at-a-glance assessment
- Unique on-board cradle to store and protect finger sensor
- Multiple power options
- Compatible with Docking Station, Attachable Printer, and BCI spot-check sensor
- Pulse amplitude Index (PI)
- Low battery indicator
- Durable, reliable performance you expect from the BCI brand
- Comfortable ergonomic design allows easy one-handed operation
- Stores patient data for transfer to PC for improved efficiency and documentation
- Three-year warranty
- Dimensions 8.5 x 15 x 4.5cm
- Weight - 340g including four “AA” batteries

SP302 Ruggerised OxyWatch Fingertip Pulse Oximeter

- The pulse oximeter is a very important and common device
- to check patient blood-oxygen saturation (SpO₂) levels and
- pulse rate. As a portable, non-invasive, small, compact,
- simple, reliable and durable physiological monitoring device,
- the fingertip pulse oximeter greatly enhances patient care.
- It is widely applied at home and hospital (including clinical
  use in internist/surgery, anesthesia, intensive care, etc).
- “Ruggerised” silicon housing adds an extra protective
  layer around the body of the oximeter
- OLED displays SpO₂, PR, Plethysmogram and pulse bar
- 6 display modes; adjustable brightness
- Automatically power off; battery-low indicator
- Suitable for adult and paediatric
- Requires 1 x AAA battery
- Battery Life: Approx 8 hours (battery capacity: 1200mAh)
- Weight Approx 50g

SP300 Digital Finger Tip Pulse Oximeter

- The new SP300 Pulse Oximeter is a small, lightweight and portable
  device suitable for use with either adults or children
- An ideal diagnostic tool for ambulance paramedics and
  emergency medical technicians working “roadside”
- SpO₂%, PR and Pleth waveforms are displayed on screen
- The display can be easily rotated to display in 4 directions
- Simple and convenient operation OLED display, compact
  (the weight is 50g including batteries)
- Low power consumption, two AAA batteries can
  be continuously operated for 20 hours
- The brightness of background light is adjustable
- Range: 30-235 BPM
- Accuracy: +/- 2BP<

SP-2101 Digital Finger Tip Pulse Oximeter with Colour OLED Display

The SP-2101 has a low profile design and is extremely lightweight. The large, colour Organic LED display offers superb visibility in all lighting conditions, including direct sunlight and the brightness can be adjusted to suit individual applications.

This durable and compact unit utilises 12 bit processing technology enabling a fast ‘true reading’ response and facilitates low perfusion capabilities.

The SP-2101 is an extremely economical piece of equipment for the spot monitoring of SpO₂ and pulse rates and can be used in a variety of environments, from use in hospitals, paramedic applications, clinics and dental surgeries through to spot-monitoring before, during and after exercise.

- Clear and bright, colour OLED display
- Display can be viewed in 4 rotations
- Large, clear Pleth waveform is displayed on 2 rotations
- Large digit display formats
- Colour coded signal quality and signal strength indicator
- Adjustable brightness
- 12 bit processing facilitates low perfusion capability
- Meets ISO 9919:2005 Standards; shock, vibration, drop and water ingress tests

Prince-180B Portable ECG Monitor

- Small, portable and easy to operate
- High resolution monochrome LCD display
- Rapid ECG & heart rate measurement by recording a 30-second ECG waveform
- Measurement of one channel ECG anytime anywhere
- Gain mode available for signal amplification
- Analysis & report display of 17 types of ECG waveform
- Memory storage and review of up to 300 records - expandable by using optional SD card (up to 8GB)
- ECG waveform & Heart rate display
- Battery indicator LCD
- Back light (switchable)
- PC data management software for data transmission and analysis
- Automatic power-off in case of no signal detected within 35 seconds
- Extendable storage capacity by SD card (optional)
- CE marked
- Dimensions: 12.5 x 7 x 2.1cm; Dimensions: 17.4cm x 12.2cm

G3H Patient Multi-Parameter ECG Monitor

The G3H is an affordable, portable patient monitor ideal for use on the move. It’s compact size and wealth of features lend it the versatility for use in a wide spectrum of environments where comprehensive patient monitoring is vital.

- Display: 8.4” colour TFT LCD screen with maximum 7-waveform display
- Portable, compact, lightweight
- Integrated carry handle for mounting on an ambulance trolley or hand rail
- Easy-to-operate user interface
- Freeze frame option to identify anomalies in patients condition
- WAN communication port to network the monitor with a central monitoring system - ideal for remote monitoring & physician diagnosis
- Optional built-in wireless networking function
- Battery: Rechargeable high-energy built-in battery
- Low power consumption with standby mode
- Continuous working time > 1 hour (full battery and measuring blood pressure every 10 minutes)
- Supports external printer to record graph and trend
- Adjustable vital signs alarm (high & low value)
- Standard configuration: ECG, HR, PR, SpO₂, ST analysis, RESP*2 (RA-LL impedance and nasal cavity), NIBP (with venous punch), TEMP*2(surface and rectal type), Drug dose calculation
- Also available with built-in 50mm thermal printer

The G3D Multi Parameter Portable Patient Monitor from SP Services combines compact size with the functionality usually reserved for higher-end monitors.

The G3D Monitor is similar to our G3H Portable Patient Monitor, but comes with more features such as 12-Lead ECG capability and a larger 12.1” colour LCD screen.

- Especially suitable for use in an emergency or the operating room
- Unique thoracic impedance & nasal tube double model respiration test method (when patient can not lie quietly)
- 12.1” colour LCD screen: Bright screen with wide viewing, 8 waveforms can be displayed on the same screen.
- Streamlined modern design with foldable handle
- Multi-language interface selection
- User-friendly and man-machine dialogue interface with pop-up menus, dialogue boxes & rotary mouse etc.
- Low-power consumption design with standby mode
- Built-in rechargeable high-energy battery
- Continuous working time > 1 hour when battery full & measuring blood pressure every 10 minutes
- Blood pressure measurement quickly and accurately with venepuncture function
- Advanced digital technology, accurately measure SpO2 in low perfusion situation
- Drug calculation, ST-segment detection, pace maker and arrhythmia analysis
- Display formats include OxyCRG diagram, 7-lead ECG waveform & large-font mode
- Can store 5 kinds of user-defined display formats
- Sound and light integrated alarm with adjustable parameters
- Suitable for adults, paediatrics & neonates
- Can review history data of 360 hours
- Applications in bedside and delivery monitoring; widely used in patient room, emergency room, operation room, PACU, ICU, CCU, etc.
- WAN communication function to network with central monitoring system for diagnosis, maintenance and software upgrades.
- Printing of data, waveform, trend tables and trend diagram
- Also available with built in 50mm thermal printer

**AT A GLANCE**

- **12.1” Colour LCD Screen**
- **12-Lead ECG compatibility**
- **8 waveforms can be displayed on the same screen**
- **Quick and accurate blood pressure measurement**
- **Low-power consumption**

**Fever Scan Thermometers**

- FeverScan Clinical Thermometer is a fast and reliable way to check for changes in temperature
- Easy to read
- Hygienic, non invasive
- Ideal for use on babies and small children
- Takes only 15 seconds

**Braun IR Ear Thermometer**

- Patented pre-warmed tip to deliver professional accuracy
- This can be used for any age person from child to adult
- ExacTemp positioning system
- Disposable Probe Covers
- Separate temperature taking button
- New modern ergonomic design
- Last reading memory recall
- Fast temperature reading
- Memory storage capacity: 8

**Single Use Thermometer**

- Sterile, safe and accurate single use thermometer
- Simple design
- Place in mouth or under axilla
- Temperature displayed
- Hygienic & effective

**Welch Allyn Sure Temp Plus 690 Thermometer**

- Delivers accurate, repeatable readings on patients of all age groups
- Removable/interchangeable oral/auxiliary probe wells to reduce the risk of cross contamination
- Fast: quickly captures accurate readings on all patient types
- Large LCD displays temperatures in Fahrenheit or Celsius
- Convenient storage for 25 probe covers
- Takes approximately 6,000 readings on 3 AA batteries

**Digital Clinical Thermometer**

- Extra flexible measuring tip
- Proven reliability
- Unbeatable measurement precision
- Extra-fast measurements (on average 10 seconds)
- Measurement accuracy: +/- 0.1°C
- Centigrade or Fahrenheit display
- Acoustic signal when measurement is finished
- Waterproof

**Timesco Tymapnic Ear Clinical Thermometer**

- One second measurement
- Easy to use
- Safe & hygienic
- 10 memories
- Energy saving auto power off
- Includes disposable probe covers
- Suitable for all ages

QUALITY - DURABILITY - PERFORMANCE

Founded in 1946, family owned, rich in tradition and today international market leader in a complete range of diagnostic instruments.

Heine products meet international standards (ISO/CE) and represent the leading edge in precision and ergonomic design.

Ongoing dedication to research and development has created a solid and diverse technology base for continued quality and product leadership. Over 500 employees worldwide contribute to this success.

SP Services stock the complete Heine range. If you need a specific Heine product, please call our Customer Services department who will be happy to assist you.

---

K180 Ophthalmoscope

- K180 Ophthalmoscope and handle with soft pouch
- Precision Heine optics
- XHL xenon halogen technology - bright white light gives a clear retinal image
- Range of lenses - 27 lenses from -35D to +40D
- Brilliant image even at high correction
- Egominal shape - the instrument fits the orbita comfortably
- Soft orbital rest steadies the instrument and protects your glasses
- Maintenence free, dust-resistant housing
- High-impact polycarbonate housing for duralility
- Soft pouch

K180 Fibre Optic Otoscope

- K180 Otoscope and handle with soft pouch
- Fibre Optic (F.O) illumination
- Homogeneous, reflex-free illumination of ear canal and tympanum
- Constructed of light, high-impact polycarbonate
- Swivelling viewing window built into instrument
- Insufflation port for reliable test of tympanic mobility
- 3x magnification scratch resistant viewing window
- 2.5v battery handle

Heine Instruments

Heine Mini 3000 Pocket Diagnostic Kit

- The Mini 3000 Pocket Diagnostic set includes a Mini 3000 Otoscope and Ophthalmoscope in a hard case

Heine Mini 3000 Otoscope

- 20,000 on/off switch cycles guaranteed
- Distal Fibre optic illumination
- Viewing window with 3x magnification and optimised casingsurface for razor sharp images and minimal reflection
- Swivelling viewing window built into instrument

Heine Mini 3000 Otoscope LED Also Features

- Maintenance-free, no need to ever change the bulb
- LED thermal management for consistent light output
- Twice as bright as Xenon halogen instruments
- Battery performance indicator
- Up to 10 hours battery operation time

Heine Mini 3000 Ophthalmoscope

- Modern pocket ophthalmoscope
- Excellent optics and the best colour rendering in minimum dimensions

EL10 LED Examination Light

- Exceptionally bright light for everyday use
- Heine examination lights incorporate the latest and most reliable in illumination technology
- A precision optical system with three specially aligned lenses produces an absolutely homogeneous and sharply focused field of illumination
- Light intensity can be regulated continuously between 6,500 and 45,000 Lux
- Spot size can be adjusted in a diameter between 8.5 and 14cm
- The coiled goose neck keeps the light exactly in the required position

Oxygen Therapy

Elite Oxygen Conserving Device

- The Sabre Elite oxygen conserving device is an innovative way of delivering oxygen to the patient, whilst conserving the gas and extending the duration of the cylinder
- Totally pneumatic, requires no external power source
- On demand oxygen is delivered to meet patient needs
- Matches the delivery performance of constant flow oxygen over a range of flow rates
- 8 flow settings
- Easy to change between cylinders, medium pressure break ensures maximum user safety
- Easy to use; a simple, single connection of a cannula to the therapy outlet of the device is all that is required

MARS Manual and Automatic Resuscitation Systems

- With Sabre MARS the operator does not have to make judgements on the lung capacity of the patient to select a tidal volume, only the basic size or type of patient being cared for.
- Once this simple operation has been made the MARS will control both tidal volume and pulse frequency within the parameters laid down in the British Standards
- RE/242 comes supplied with a full D size oxygen cylinder

Cylinder Holders

Oxygen Cylinder Carry Sleeve

- Handy nylon sleeve made from 840 denier nylon
- Includes rubber grip handle
- Velcro fastening for easy access
- Adjusts to accommodate most ‘D’ sized oxygen cylinders
- Reflective strips for improved visibility

Barrel Bags

- Heavy duty 840 denier nylon UK made barrel bag
- Ideal for use with resuscitation, oxygen therapy or entonox kits
- Internal storage pockets for documents & masks
- Reinforced handle and detachable shoulder strap
- Will carry a D or CD size cylinder or equivalent
- Velcro loops for storage of guedel airways, etc
- Choice of 5 colours/personalisation option available
- Reflective strip for maximum safety
- The Antibacterial Models have been treated with a bacteriostatic and fungistatic agent to protect the product from bacterial and fungal growth
- Also available kitted to your requirements

Oxygen Therapy

Oxygen is the most important single substance in animal biology. It constitutes nearly 50% of the mass of the planet, 21% of the air we breathe, 50% of rock and 89% of water and yet it took man a surprisingly long time to discover its significance in terms of combustion, respiration and animal metabolism.

Oxygen is essential for normal respiration in aerobic organisms. Upon entering the lungs, O₂ molecules dissolve in the lipid and aqueous phase of tissues and diffuses across alveolar membranes and into alveolar capillaries. The vast majority of oxygen is bound to haemoglobin and only a small fraction, less than 2% is dissolved in the plasma. Following the transport to various tissues, oxygen diffuses into the cells for metabolism.

Normally, a reduction in arterial oxygenation is compensated for by an increase in cardiac output to avert tissue hypoxia.

When this ceases to be adequate, tissue hypoxia is accompanied by acidosis, a fall in standard bicarbonate and pH. Oxygen therapy becomes necessary when the arterial oxygen tension falls below 50mm Hg.

The objective of oxygen therapy is to increase arterial oxygen tension, so that normal O₂ delivery to the tissue is restored. The essential aim of oxygen therapy in respiratory disorders is to prevent further clinical deterioration. Patients rarely remain viable with arterial blood values below 25mm Hg.

Oxygen therapy devices fall into 2 categories:

Variable Performance
(Convexity Concentration Masks, Non-Rebreathing Masks, Nasal Cannula and Nasal Catheters)
These devices administer uncontrolled oxygen therapy because the patient creates the inspired mixture by breathing.

Fixed Performance
(Venturi Type Masks)
Create a constant proportion of air/oxygen mixture in excess of patient inspiratory flow rate.

Medium Concentration Mask
Small capacity, variable performance mask designed for use when precise control of inspired oxygen concentration is not mandatory. The rates below are dependant on the patient’s breathing rate and tidal volume.

<table>
<thead>
<tr>
<th>FLOW RATE (L/MIN)</th>
<th>2</th>
<th>4</th>
<th>6</th>

<tbody>
<tr>
<td>OXYGEN CONCENTRATIONS</td>
<td>28%</td>
<td>35%</td>
<td>40%</td>
<td>50%</td>
<td>60%</td>
</tr>
</tbody>
</table>

Non-Rebreathing Mask
Sometimes known as the Trauma Mask, a Non-Rebreathing Mask provides a high concentration of oxygen and the reservoir bag allows for adequate oxygen to be available to meet the unpredictable needs of the patient. At a flow rate of 15 litres per minute an oxygen concentration of up to 99% can be achieved depending on breathing pattern and tidal volume.
Oxygen Therapy

**Standard Oxygen Therapy Masks**

**SP Emergency CPR Face Mask**

- Emergency CPR mask in protective hi-vis case
- One way valve and directional diaphragm which allows no backflow of air or contaminants from patient to rescuer
- Easy to use
- Mask & one-way valve comes fully assembled - ready to use
- Clear plastic, designed to fit adult or child
- Anatomically designed for superior fit
- Soft inflated cuff
- Mask not affected by extreme temperatures, keeping its flexibility
- Standard 22mm fittings - can be used with bag & mask resuscitator
- Flexible dome folds into pocket-size mask
- Compact carrying case with instructions
- Allows inspection through clear mask dome aiding patient monitoring
- Bright neon yellow case - easy recognition in most situations
- O2 port & headstrap as standard
- CE, ISO & FDA approved

Ambu™ Oval Silicone Resuscitators

- Transparent, reusable silicone bag and mask
- Designed for the manual ventilation of paediatrics through to adults
- Easy to clean and sterilise
- Can be autoclaved at 134°C.
- Low weight
- The patient valve with swivel enables free positioning of the bag without removing the mask from the patient
- Reduced fatigue during manual ventilation - ergonomic bag design secures optimal user handling and support during extended ventilation
- The bag has superior surface and grip properties.
- Safety hand strap and O2 reservoir supplied

SMART BAG® The Most Revolutionary Advance in Bag-Valve-Mask Performance in Over 40 Years!

The SMART BAG has been designed to allow the provision of consistent ventilations while almost completely eliminating the risks associated with conventional BVM ventilation. The unique actuating mechanism hidden inside the neck bushing of the SMART BAG actually responds to the rescuer and the patient.

By responding to the rescuer’s squeeze and release of the BVM, the SMART BAG limits the excessive flow of gas into the patient’s airway, significantly reducing the risk of gastric insufflation by effectively lowering the airway pressure generated. In a normally compliant and resistant airway, the airway pressure is limited to below the esophageal sphincter opening pressure of 19cm H2O.

The response by the SMART BAG is proportional to the rescuer’s squeeze. The harder the squeeze, the greater the restriction to flow. This alerts the rescuer to ease up on the squeeze, reducing the effort required, resulting in the airway pressure being kept to the minimum to achieve adequate ventilation. At no time is the flow of gas into the patient compromised by the SMART BAG, allowing the rescuer to ventilate even the stiffest lung or most restrictive airway.

To assist the rescuer a visual warning of incorrect ventilation technique of the SMART BAG is provided. If the SMART BAG is squeezed too hard, the SMART BAG responds by closing the valve to lower the flowrate. Should this occur, the red pressure actuating indicator moves to the forward position in the neck of the patient valve producing a visual warning of improper technique.

**Features at a Glance**

- Available in two models (Adult & Child/Infant)
- Transparent Facemask allows for easy monitoring of skin colour, signs of vomitus or body fluids
- Complete with Oxygen Reservoir System and Oxygen Tubing
- Controls Flowrate
- Controls Airway Pressure
- Controls Ventilation
- Reduces the Risk of Gastric Insufflation
- Designed to allow the provision of consistent ventilations while almost completely eliminating the risks associated with conventional BVM ventilation
- Responds to rescuers squeeze of the bag
- Responds to changing airway conditions

- Includes:
  - Argus Standard Trauma Bag Red
  - Guedel Disposable Airway Sizes 1,2 & 3
  - Vitalograph Emergency Aspirator
  - Silicone Resus Bag - Adult Size

**Sabre Mars Ventilator**

The Sabre MARS is based on two central components: the control module and the patient valve. The gas supply passes through the automatic channel and is delivered to the patient as a specific breathing programme in accordance to the patients size as per the flow selector.

- Manual and Automatic Resuscitation System
- A Demand valve delivers 100% Oxygen upon inspiratory phase, shutting down the automatic breathing programme
- Selectable tidal volume/patient settings are available for the automatic mode
- An audible alarm will sound if; the airway reaches 45 cm H20, the patient airway pressure becomes over pressured/ blocked or the automatic breathing senses zero flow

- 5 x Hypo needles 25g x 5/8” single
- 1 x Dual head economy steth Blue
- 1 x Arm-lok elbow immobiliser
- 1 x Portex intubation stylet medium
- 2 x Butterfly IV cannula 21g Green
- 2 x Butterfly IV cannula 23g Blue
- 2 x Avon 100 blood IV giving Set x 1
- 1 x Set of 6 guedel disp airways
- 1 x Blue line cuffed ET tube-6
- 1 x Blue line uncuffed ET tube-5
- 1 x Blue line cuffed ET tube-7
- 1 x Blue line cuffed ET tube-8
- 1 x Blue line cuffed ET tube-9.5

- Designed by experienced paramedics
- A single case that holds all equipment associated with infusion & intubation
- Available empty or kitted to your requirements
- Dimensions: 489 x 363 x 210mm
- Case Contains

Merlin First Response Kit

- Contains a comprehensive range of emergency medical equipment suitable for a wide range of emergency situations
- Bag features shoulder and back straps, detachable colour coded pouches, exterior pockets
- Made from tough, water resistant material

- Merlin paramedic resus bag
- 3 x Merlin Silicone re-usable resuscitators (adult, child & infant sizes)
- Res-Q-Vac emergency hand-held aspirator (adult & paediatric attachments)
- 7 Guedel airways (000 - 4)
- Laryngoscope set (handle & 4 x Macintosh blades - sizes 1-4)
- Merlin E-Mask
- 2 x Magill Endotracheal forceps (adult & child sizes)
- Tuf-cut scissors
- Sharps bin
- Aerosol therapy set with mask
- Emergency foil blanket
- 4 x ET tubes - cuffed (sizes 5.5mm, 7.5mm, 8mm & 8.5mm)
- Tynan Sprague stethoscope
- Quick release tourniquet
- 6 x disposable pen torches
- Spencer Wells forceps 5” straight
- Dressing scissors 5” sharp/sharp
- 3 pairs of nitrile gloves (sizes small, medium & large)
- IV giving set

O-Two CPAP with Adult Mask and Harness

The O-Two CPAP system is a disposable respiratory aid device intended for use in the hospital and pre-hospital environment to provide non-invasive ventilation to the patient in respiratory distress.

When connected to a regulated oxygen therapy gas supply and attached to the patient via a face mask, the device provides a constant positive airway pressure in the patients lungs throughout the respiratory cycle. This is achieved by selecting flow rates on the therapy flow control to create the desired rise in the baseline level.

The CPAP from O-Two is such a innovative design it was recently awarded the 2011 EMS World Innovation Award.

- Has a unique high visibility CPAP valve with integrated flow nozzle and crush resistant oxygen tubing
- Completely disposable
- The smallest and lightest on the market
- Is an “Open” system allowing the patient suffering from respiratory distress to breathe on ambient air with no restriction to volume or flow without feeling compromised or restricted
- Has the longest cylinder duration of all disposable CPAP devices currently available (e.g. at 5.0 cm H₂O of CPAP the cylinder duration is 52 minutes vs. other devices that average 28 minutes).
- Is simple-to-apply and easy-to-use and requires minimal training – place the mask on the patient’s face and adjust the regulators adjustable therapy flow to select the desired level of CPAP
- Allows the provider to “Titrate to Effect” in precise increments based upon the patient’s needs.
- Provides the highest range of settings available (from 5cm H₂O to 20 cm H₂O) without the need for costly separate interchangeable PEEP valves or special “High Flow” therapy regulators being required
- Has clearly marked CPAP settings and corresponding regulator therapy flow requirements
- Provides a minimal pressure drop on inspiration and minimal pressure spike on expiration producing a more uniform CPAP pressure throughout the respiratory cycle creating a lower work of breathing (WOB) for the patient
- Produces accurate CPAP pressure based upon the oxygen flow rate selected on the regulator eliminating the need for a separate pressure manometer using our patented Vectored Flow Nozzle Technology
- Has minimal pieces for ease of assembly - CPAP valve components are preassembled and glued which reduces set up time and reduces the potential for incorrect assembly
- Has a neoprene head harness system that is easy to apply, comfortable and prevents excessive sweat, slippage on the patient’s head and does not pull on hair
- Uses industry standard mask connections – compatible with most respiratory masks and accessories
- Size 5 mask included
- Supplied in a pack of 10

E700 Electro Pneumatic Transport Ventilator

The e700 ventilators usher in a new era in controlled ventilation for resuscitation and patient transport!

These electronically controlled, pneumatically powered ventilators provide a range of ventilation solutions for all types of patient requirements and all levels of pre-hospital and in-hospital healthcare professionals.

The range of ventilation solutions offered by these devices cannot be compared to any other products of their type.

With a long lasting (18 hour) battery life, these remarkably small and lightweight (2.4kg) ventilators only require attachment to a regulated oxygen supply and a transport ventilator circuit for immediate use. The easily replaceable battery can be charged while inside the ventilator or can be removed for charging and quickly replaced by a fresh battery pack.

• When long patient transports are required, the e700 provides the range of ventilation modes that meet the needs of the patient requiring controlled or assisted ventilation
• With volume modes as well as CPAP, you are assured of having the right option to meet the requirements of your chosen ventilation strategy
• The addition of BiVL Ventilation, Pressure Support and Pressure Control, the functions offered by the e700 provide the healthcare professional with additional flexibility in their set up adjustment
• The e700 features additional modalities to truly emulate the ventilation options offered by standard intensive care ventilators
• These provide the ventilation modes necessary to maintain continuity of care during patient transport
• The “e” series of ventilators are ideal for long transports where both electrical and oxygen supplies are always a critical concern

E500 Electro Pneumatic Transport Ventilator

The e500 transport ventilator provides trained individuals with a safe and effective means of providing controlled ventilation during patient transport, respiratory and/or cardiac arrest

• The e500 ventilators are specifically designed for the demands of emergency, rescue, resuscitation and critical patient transport
• The addition of CPAP improves the flexibility of use for this model
• Simple and quick to set up, it provides a range of 12, physiologically normal, tidal volume/ventilation frequency setting selections for children over 15kg to large adults
• In addition to the patient care benefits the “e” series of ventilators provide excellent low gas consumption, long battery operating time (18 hours) and light weight (2.4kg)
• The “e” series of ventilators are ideal for long transports where both electrical and oxygen supplies are always a critical concern
• The e500 and e700 ventilators provide flexibility in your choice of functionality and application

Treatment

N.O. Equipment

- A self administered system of pain relief delivering a 50% nitrous oxide & 50% oxygen analgesic gas
- Can be used with either a face mask or mouthpiece
- New 'Ease' patient demand valve will deliver a flow of 300l/min but at an inspiratory resistance of 1/3 as required by the British Standard
- Exceeds BS4272 British Standard
- Exceptionally light, this product is designed to administer effective pain relief in a wide range of medical situations
- Designed with reliability, robustness, easy servicing and maintenance in mind
- Designed with weight, size, performance and requirements expressed by modern medical professionals in mind
- Demand valve is ergonomically designed so that the patient does not block the exhale ports when holding the valve
- Places minimum physiological loading on patients requiring pain relief
- Easy to operate even for distressed or frail patients
- Unit incorporates a test/vent button for checking unit prior to use and venting the unit following use
- Low exhale resistance making the SABRE EASE the most user friendly unit currently available

The EzyVac is probably the most complete hand-held pump available for emergency suction. This state of the art light weight, portable device can be powered with one hand operation, leaving the other hand free for different tasks. It produces an incredible high vacuum for its size and is extremely versatile.

The EzyVac was designed with a 100° swivel, which gives the operator much more freedom to manoeuvre around tight situations and avoids premature engagement of the overflow mechanism.

The simple design ensures effective operation and simple maintenance.

A cost effective alternative offering convenience and performance and a wide range of features and benefits.

Comes complete with disposable collection canister and 2 suction catheters (Adult & Child)

- Fast and powerful performance - offering superior performance
- Compact and lightweight - takes up very little space in your kit bag
- No special storage conditions required
- Extremely easy to squeeze handle even for small hands
- Disposable 300ml collection container - no cleaning or sterilisation required
- Low cost operation and no need for regular maintenance

SP Easy To Use Disposable Suction Unit

- The SP Easy to Use Disposable Suction Unit, complete with a large bore catheter, is a simple unit ready for use straight out of the bag
- A compact unit that allows easy suction of patients who have vomited
- Resilient silicone bulb performs reliably in even the harshest climates with no loss of suction
- Strong, compact bulb creates a minimum vacuum pressure of 110 mmHg
- A one-way valve will prevent backflow of collected fluids
- Collection bag holds over a litre of fluid
- Contoured suction tube tip prevents tissue damage during application
- Reliable, simple and inexpensive manual suction device for clearing airway obstruction
- Single use only

Vitalograph Emergency Aspirator

- Design Council award winning design
- Hand powered - no batteries or leads
- High quality, robust and cost effective
- Compact and portable
- Easy one handed operation
- Reusable suction container
- Components are easily cleaned, sterilised and disinfected
- Widely used in ambulances, hospitals, doctors surgeries, dental practices, industry, sporting organisations, the armed forces and occupational health departments

Laerdal Penguin Suction Device

- Babies’ nasal passages can become blocked for many reasons including exposure to viruses or irritation from allergens
- Clogged nasal passages can interfere with babies’ ability to feed, and in very young newborns, their ability to breathe
- Designed to clear babies’ airways, the Penguin is made of one piece of silicone making it easy to clean and durable, able to withstand hundreds of uses
- The Penguin was developed to support basic newborn resuscitation courses like Helping Babies Breathe, aimed at improving newborn outcomes in developing countries

SAM e.p.s (Emergency Portable Suction) Unit

- The SAM e.p.s (Emergency Portable Suction) aspirator offers a new benchmark in battery operated suction equipment
- Ideal for emergency services
- A simple single knob with vacuum settings for typical adult and paediatric medical procedures controls the unit
- Bright, clear ‘easy-wipe’ digital display indicates the vacuum level and battery status
- Operating the e.p.s is straightforward even when wearing gloves or other protective equipment
- Includes a high performance low energy pump, fast suction build up, onboard lighting, a unique rotating bottle system allowing the unit to be laid flat in difficult terrain
- The e.p.s is fitted with a specialist lightweight portable piston pump giving a maximum suction in excess of 550mm Hg and a flow rate above 32l/min
- At low vacuum levels the pump is whisper quiet to give minimal disturbance to the patient
- Fitted with an internal charger
- Includes Abbot container and disposable liner
- The efficient pump and an innovative power management system give the e.p.s an extended battery life of over 2 hours at maximum power with a single charge and in excess of 6 hours at lower settings
- Specifically designed following consultations with doctors, paramedics, resuscitation officers and other medical staff and is suitable for use in ambulances, general hospital wards & critical care

### OB3000 Portable Suction Unit

- Smaller, lighter and more powerful than the market leader with 78% longer battery capacity
- Designed and built to the highest quality and meets all new and existing safety standards
- High specification unit
- 80 minutes capacity on free cycle usage
- Reusable collection canister or canister compatible with Serres liner
- Ergonomic exterior vehicle mounting system
- Internal micro processor for improved safety and clinical governance
- Powerful pump giving 33 LPM suction power and 800mbar pressure
- Lithium polymer battery (solid-non organic)
- Battery status indicator with no need to turn on the device
- Internal microprocessor monitors and logs system usage, indicating when service is needed
- Safety inspection reminder
- Analogic fluorescent vacuum meter, with mmHg scale upon request
- Compliant to all current norms, 93/42/CEE Directive and main reference norm ISO10079-1
- Weight 2.8kg
- Supplied with 12v in-vehicle charging lead. Mains charger available (optional extra) and charging wall bracket (optional extra)

Serres Conversion Kits

Following the demise of the Abbott range of liners and cannisters, most customers are now having to convert various brands of suction units over to the Serres type of liner/bag. This has proved to be very inconvenient and confusing for lots of our customers.

Serres Conversion Kits provide a simple solution to this problem, making it easy to use a Serres type liner/bag in your existing suction unit.

Please contact our customer services department for help in choosing the correct conversion kit for your needs.

The new iPAD SP2 is the latest in the range of Intelligent Public Access Defibrillators. The SP2 is an easy to use AED (Automatic External Defibrillator) which has a manual override function and is both compact and light, but at the same time able to deliver the features of a much larger and expensive AED.

The SP2 automatically reads the patient’s electrocardiogram (ECG) and determines if a cardiac arrest that requires defibrillation has occurred. This ECG is also shown on the new larger colour screen, adding to its civilian usability by adding confidence in being able to see what is occurring whilst also hearing it through the voice prompts.

Features
- AED with manual override
- Fixed or escalating energy
- Colour screen
- ECG with sync
- Multi event data recording – 3 events, 17hrs each
- Easy data transfer via SD Card
- Free data analysis software
- One set of pads for both adults and children
- Ambient noise detector automatically adjusts voice prompt according to background noise
- Pre-connected ‘smart’ electrodes
- Rechargeable or disposable battery
- Waterjet Proof to IP55
- Complete with case, rechargeable battery, battery dock and electrodes as standard
The new iPAD SP1 is the latest in the range of intelligent public access defibrillators from one of the worlds leading manufacturers of clinical defibrillator monitors.

The iPAD SP1 is an easy-to-use Semi-Automatic External Defibrillator (AED) that is small, light, and portable. The AED automatically reads the patient’s electrocardiogram (ECG) and determines if a cardiac arrest that requires defibrillation has occurred.

Designed to be used by minimally trained individuals, the iPAD SP1 is suitable for use almost anywhere that people gather, whether it’s within the workplace, a shopping centre or a hospital, the iPAD SP1 makes saving lives easier than ever.

Easy to switch from adult to child mode without changing pads whilst a safety cover prevents accidental switching

- Simple switch to select adult or child mode
- Pre-connected ‘smart’ electrodes
- ‘i’ button technology
- Ambient noise detection
- Pad life indicator
- CPR detection
- Integrated pad storage
- Low cost of ownership
- No need to buy separate child pads
- Internal memory records 5 events
- Built in SD card port and IrDA port
- 7 year warranty on unit
- Supplied ready to go with 2 sets of pads, 2 AED starter kits, a 4 year lithium battery and a FREE carry case

Lifepak 15 Monitor/Defibrillator

- The LIFEPAK 15 monitor/defibrillator is the new standard in emergency care for ALS teams who want the most clinically innovative, operationally innovative and LIFEPAK TOUGH device available today
- The LIFEPAK 15 device balances sophisticated clinical technologies and supreme ease of use in a device that’s tough enough to stand up to your most challenging environments
- The 15 integrates Masimo Rainbow SET technology that monitors SpO2, Carbon Monoxide and Methemoglobin
- Includes a metronome to guide CPR compressions and ventilations
- Provides an option to escalate energy to 360J
- Continuously monitors all 12 leads in the background and alerts you to changes using the ST-Segment trend monitoring feature
- An entirely new platform, the 15 is powered by Lithium-ion battery technology, incorporates the SunVue display screen for viewability in bright sunlight, and data connectivity to easily and securely collect and send patient information

Key Features at a Glance

- Large full colour screen (8.4 inches diagonally)
- Dual-mode LCD screen with SunVue™ display, which the user can switch from full colour to high-contrast SunVue mode with a single switch
- Both AC and DC power options available, as well as the choice to use the latest lithium-ion battery technology, chargeable within the device itself, for up to 6 hours of power.
- The unit’s two battery system requires no conditioning or maintenance and in addition, you can monitor the status and service life of your batteries using Lifenet® Asset (part of the Lifenet System data network), which can alert you to any potential issues
- P447 rating for continued use in wind, rain and other harsh environments
- Survives 30” drop tests (equivalent to dropping the unit from cot height)
- Shock absorbing handle
- Double layer screen
- Redesigned cable connections for added strength
- Self-checking feature alerts Physio Control if attention is needed, so on-site maintenance or repair, access to parts and highly trained service representatives are available 24/7
- The 15 platform is designed with specific flexibility to allow upgrades and evolution to meet new guidelines and changing protocols. This can help avoid costly upgrades and premature replacements, without losing speed or power

**LP1000 AED**

- Rugged Construction - Rigorously drop-tested device and protective case and bumpers
- Vehicle Friendly - Designed to ride along in any vehicle without damage from continuous vibrations and other movement
- 360 Joules - Can escalate defibrillation power to an industry leading 360J
- cprMAX Technology - Minimizes CPR interruptions by allowing compressions to continue during AED charging
- CPR Countdown Timer - Provides direction for length of hands-on time for each CPR period based on system protocol
- ECG Capability - 3-lead ECG function is available when needed
- Shock Counter - Digitally records and displays delivered shocks for added insight
- Large Display - Large easy-to-read LCD screen provides more information at a glance
- Compatible Technology - Electrodes are fully compatible with all other LIFEPAK defibrillators and monitors

**CR Plus AED**

- Designed with a simple two-step process that gives the first person to respond to a SCA victim the confidence they need to help save a life
- Easy to own and maintain
- Synchronized replacement of the electrodes and battery
- CHARGEPAK will keep your maintenance burden at a minimum
- Readiness display with four indicators let you know it’s ready to do its job
- The fully automatic model of the LIFEPAK CR Plus AED is designed to deliver a shock only if it determines a heart needs it
- User interface includes voice prompts, audible tones and graphic prompts
- 8-year warranty on the LIFEPAK CR Plus AED
- Dimensions: 10.7 x 20.3 x 24 cm
- Weighs: 2kg

**TrueCPR**

- TrueCPR can provide critical, real-time CPR feedback, which provides assessment both during and after the event
- Compression depth and rate are displayed in real time on a highly visible dial
- A CPR metronome and ventilation prompt guide the rescuer to deliver compressions according to current guidelines
- TrueCPR is the only CPR feedback device that uses Triaxial Field Induction (TFI), a proprietary technology from Physio-Control
- During CPR, TFI uses three dimensional magnetic fields to pinpoint the distance between two objects - the chest pad and the back pad - to accurately measure chest compression depth and provide high
- Captures 180 minutes of rescue data, which can be reviewed post-event with Physio-Control’s data review software
- Can be used with any AED, making it an ideal adjunct to your rescue kit

Zoll AED3 Semi-Automatic External Defibrillator

- Designed and built upon years of usability research with both trained and untrained rescuers - easy to use
- Real CPR Help that can see your chest compressions during CPR to let you know when you are doing high-quality CPR
- High-resolution full-colour graphic images and text accompany audio prompts for easy understanding of what to do next
- Constant metronome at a rate of at least 100 compressions per minute to comply with the latest guidelines
- Universal CPR Uni-padz for push-button selection of child rescue using the child button
- Shock delivery - 8 seconds after stopping CPR (Semi-Automatic Defibrillator) and 13 seconds after stopping (Automatic Defibrillator)
- Dual orientation (upright or flat) for the best visibility in a rescue
- Scissors attached to CPR Uni-padz for easy removal of clothing
- Rescue accessory pack containing non-latex gloves, barrier mask, razor, paper towel and towelette
- Battery life 5 years
- No maintenance inspections required

Prestan Professional AED Trainer

- Provides quality, durability and affordability like no other trainer in the market
- Clear, confident voice instructions that provide easy-to-follow directions
- Preconfigured scenarios make training students easier
- Includes a scenario, volume control, and language button
- Pads can be used at least 25-30 times during CPR/AED classes
- Contains a pad testing system
- Pads are pre-connected
- Pads have an embedded ‘switch’ in the pad which senses that the AED Trainer pads are attached to the manikin torso
- The silicone base adhesive on the pads, coupled with the foam structure, ensure easy application & removal

XFT-D0009 Mini AED Trainer

- Designed to effectively train emergency responders in the use of an AED device
- Helps responders became familiar with an AED and allows them to demonstrate the basic skills necessary to use an AED in an emergency
- Adult and paediatric pads are included
- No high-voltage capabilities, ensuring safety during training
- Complies with the latest Guidelines
- Voice prompts in a choice of 16 languages
- Very small and convenient
- The device has voice broadcast and LED display functions (Work instructions, electrode pads direction, shock instructions, warning signs)
- The device has voice prompts and LED indication during the two minutes CPR pause time

XFT-120C+ AED Trainer

- Designed with a replaceable plug-in card allowing the device to be customized by uploading different language and scenario options
- When Guidelines are changed, customers only require a new plug-in card to update the scenarios
- A metronome is added to the flashing lights when the unit is counting out the 2 minutes for CPR
- Prompts 100 compressions per minute to help the trainers perform CPR properly
- Completely compliant with AHA new guidelines
- Pre-configured with 10 training scenarios that simulate realistic sudden cardiac arrest episodes
- DC interface allowing users the option of connecting to the mains adapter, (DV 4.5V, 300mA) or use batteries
- Audio out interfaces enables the connection of external speakers which is helpful for instructors during teaching
- Remote Control function
- Five pairs of pads are included in the package (Adult and Paediatric)
- Fully auto and Semi auto scenarios selectable

GreenUrban ‘EcoPad’ Public Access Defibrillator Cabinet

- Built to cope with the challenges of the British & Irish climates the EcoPad has all the features you would expect from a public access defibrillator cabinet, with the added benefits of thoughtful and sympathetic engineering design
- The EcoPad has been designed to be water resistant and to maintain a high enough temperature during winter months to ensure that the defibrillator and pads are protected in our wet & cold weather climate
- Can cope with outside temperatures as low as -15 degrees celsius and has actually been tested down to -20 with successful results
- Easily installed
- No electrician required - plugs into a standard wall socket
- Low voltage ‘In Box’, 12 volt transformer for low running cost
- Frost protection heater
- Status lights indicate if AED is present
- Internal light to aid night use
- Single hand entry
- Blank dedication panel
- Pre set locking codes as required
- 304 grade stainless steel outer shell

LifeBox AED Cabinet

- The LifeBox AED Cabinet is a highly visible, secure way to store publicly accessible defibrillators in any environment
- In the case of a heart attack, for every minute that passes without defibrillation, the chances of survival drop by 7-10% - after 10 minutes, survival is unlikely
- It is therefore not only critical to have defibrillators in areas where an ambulance could take more than 5 minutes to arrive, but also to ensure that they are highly visible and easy to access
- Having a defibrillator locked in a cupboard in a first aid room is of no use in a crisis
- The LifeBox has been developed to have various locking options to suit every environment
- Combination locks prevent the defibrillator being stolen, yet provide a quick way for 999 operators to grant access to the public when required
- Combination locks prevent the defibrillator being stolen, yet provide a quick way for 999 operators to grant access to the public when required
- Alternatively, a key lock with ‘Break Glass’ key safe can be provided
- Features a light and inspection window

DefibSafe Lockable AED Cabinet

- The DefibSafe aluminum lockable wall mounted outdoor cabinet takes the worry out of keeping your defibrillator accessible and protected.
- Lightweight and simple to install, this takes the worry, time and expense out of fitting. It is inexpensive to run, easy to maintain and can endure all weather conditions.
- Made from Aluminium with a durable powder coating - Unlike steel there will be no corrosion, even if the coating gets damaged.
- Lightweight construction - Improves ease of fitting and installation.
- Large inspection window - No need to open the cabinet to check the defibrillator inside.
- High quality mechanical lock with large keypad - Easy to use & no digital malfunctions to delay or prevent entry.
- Single hand entry - Improved handling in wet/cold conditions with a large 'clutched' handle for protection from lock damage & forced entry.
- Internal LED lighting - Excellent visibility and continually back lit.
- IPX65 Rating - Protection from the elements in all weather conditions, ideal for exposed areas.
- Full Thermal Insulation - Highly efficient foil board keeps running costs to a minimum.

DefibSafe 2 Defibrillator Wall Mountable Cabinet

- A successor to the original DefibSafe Aluminium outdoor cabinets, the DefibSafe 2 has been designed to provide even higher quality and security level at a lower price point.
- Durable polyethylene exterior cabinet for corrosion & impact resistance.
- Polycarbonate access door for superior security - The same material used to construct riot shields.
- High quality, corrosion resistant Stainless Steel mechanical lock with lifetime warranty.
- Large handle for easy opening single handed entry.
- IP66 rated, giving superior protection from the harshest weather conditions.
- Unique location code with each cabinet, ensuring that help in emergency can be sent straight to the cabinet location and a 999 call operator can pin point the defibrillator location.
- LED lighting for internal illumination making the cabinet visible at night.
- Extremely economical to run (average £2 - £3 per year).
- Air circulation prevents condensation.
- Tough and thermally efficient with a safety cut out feature.
- 3 bolt fixing to wall ensures a stable fixing even on uneven surfaces.
- Designed and manufactured in the UK.
- Dimensions: 62.5 x 44 x 28.5cm.

LUCAS 2 Chest Compression System

The LUCAS Chest Compression System is designed to help improve outcomes of sudden cardiac arrest victims and improve operations for medical responders. Performing at least 100 compressions per minute with a depth of 5cm, LUCAS can be deployed quickly with minimal interruption to patient care.

The LUCAS 2 Chest Compression System is a safe and efficient external CPR tool that ensures CPR given is both standardised and effective in the event of cardiac arrest.

Providing a high level of quality CPR for all patients, this tool is vital in ensuring patients’ survival, it allows you to call for assistance and focus more on the victim’s medical needs, such as medication or defibrillation, without interrupting CPR.

It sets up quickly and performs the compressions at a continued rate and will not stop until no longer connected to a power supply. This is important as someone administering CPR can become exhausted and no longer able to perform manual compressions.

It can be run off a battery alone as well as by an electrical or car power outlet. Using new Lithium-ion Polymer battery technology, it takes around 4 hours to charge and runs for approximately 45 minutes. The battery can last for around 3 years, or 200 uses depending which comes first, before it will need to be replaced.

- 100 compressions per minute with a depth of 4-5 cm
- 50/50 duty cycle, for compression and decompression
- Complete chest recoil before next compression
- Can be applied within seconds
- Designed to minimize interruptions of manual CPR during application
- Frees up caregivers to focus on other life-saving tasks; ventilation, medication, defibrillation etc
- Small and lightweight Back Plate facilitates application in confined spaces
- Two compression modes; 30:2 mode or a continuous mode with ventilation alerts
- Allows access to patient’s chest to place defibrillation pads
- Smart Restart function allows for an immediate resumption of compression after change of battery as it remembers the patient settings during 60 seconds
- Super lightweight at a tiny 0.6kg
- Dimensions: 13 x 8.5 x 5.5cm

• Disposable Europa Laryngoscope handles made from high quality plastic
• Provides a great solution to prevent cross infection in emergency or routine intubation
• Complies with ISO7376 and fits all conventional ISO7376 blades
• IN/790 requires 2 x C batteries, IN/789 requires 2 x AA batteries

MAD300 Mucosal Atomization Device

• Delivers intranasal medication in a fine mist which enhances absorption and improves bioavailability for fast and effective drug delivery
• Safe and Painless, no needle - no shot - no pain
• Atomized medications absorb directly into the brain and CSF via the olfactory mucosa (nose-brain pathway)
• Consistent, reliable spray every time

**Thomas ET Tube Holder**

- Designed to secure the ET tube in place after insertion in the trachea
- Holds the ET tube in place by means of a quick-set screw that also facilitates easy removal without the bother and mess of tape
- Open-cell foam padded backing allows patient’s skin to breathe
- Pliable bite block keeps ET tube open
- Tab assures the strap is put on tangle-free
- Special velcro strap provides strength and comfort
- Mouth access hole allows for in-use suctioning
- Single use only, and individually wrapped
- Quantity discount available - call for details

**End-tidal CO₂ Detectors**

- **CO₂ detectors to reliably confirm correct endotracheal tube placement**
- Responds quickly to exhaled CO₂ with a quick colour change from purple to yellow
- Highly visible display window provides breath to breath visual feedback

**Grip-ET Tube Holder**

- Designed to hold an endotracheal tube in place
- Works with any ET tube from sizes 4.5 to 14mm
- Fits most Laryngeal Mask Airways and Combitubes and now comes with a bite block
- Patented clip slides into place, locking easily and quickly
- Wide open base leaves the mouth open for visualising and suctioning the mouth

Gum Elastic Bougie/ Tracheal Tube Introducers

IN/201

- Choice of reusable or single use
- Designed to give good directional control during routine or difficult intubations when the laryngeal inlet cannot be seen completely
- Crooked tip permits the introducer to be steered around obstacles and through the laryngeal apertures

- Choice of reusable or single use with straight tips
- Recommended for use in cases where a tracheal tube exchange is necessary
- Available in Paediatric 5Ch & Adult 10Ch & 15Ch sizes
- Designed to aid changing of tracheal tubes

- Our new range of single use Bougie Introducers has been designed to support successful intubation without compromising patient safety
- Single use & sterile packed reduces risk of cross infection
- High gloss, low-friction outer surface improves tube glide over bougie
- Low point-of-pressure tip reduces risk of accidental trauma
- Available in 10Ch & 15Ch suitable for use with all tubes from 4mm (ID) to 10mm (ID)
- Also available in 5Ch for use with 2.5mm (ID) tubes
- Extra tip graduations allow for improved laryngeal inlet entry & exit guidance
- Clear, highly visible outer packaging for ease of product identification in emergency situations
- Highly visible product colour for improved positioning
- Barium tip for improved X-Ray guidance
NasoSafe NP Airway - Sterile

NasoSafe is a new and innovative nasopharyngeal airway. The swivel safety grip eliminates the risk of the airway travelling down the nasal passage while providing the maximum comfort for the patient.

- NasoSafe grip protects the nasopharyngeal airway from loss in the nasal passage
- Rounded edge of the tip combined with the angle cut design helps to reduce the risk of injury during intubation
- Better tolerated by patients than oropharyngeal airways
- Ideal when oral passage is not accessible
- Allows access for nasotracheal suctioning
- Swivel grip provides maximum comfort and safety
- Grip can be rotated to avoid blocking the free nostril
- Size colour coded to match suction catheter colour coding
- Made from medical grade PVC

ATLS Equipment

**Portex Cricothyroidotomy Kit for Emergency Airway Access**

- Innovative needle design indicates entry to the trachea and any subsequent contact with the posterior tracheal wall
- 6mm bore Cricothyroidotomy tube enables spontaneous breathing and the Soft Seal cuff secures the airway
- Designed to meet emergency requirements
- Pre assembled procedure kit, compact and robustly packaged for inclusion in ‘trauma bags’
- Supplied sterile in flexible outer plastic shell
- Includes:
  - PCK Device
  - Scalpel Size 15
  - 10ml Syringe
  - Lubricating Gel
  - Tube Holder
  - Nylon Suture
  - Tube Holder

**Quicktrach Emergency Cricothyrotomy Device**

- A simple quick method to provide emergency airways with minimal bleeding
- Insertion gauge for optimal depth measurement helps avoid penetration of the rear tracheal wall
- 15 mm connection for bag & mask or resuscitator
- Prior incision by scalpel not required
- Fixation plate and neck tape provided to enable safe and

**Portex Emergency Chest Drain Kit**

- Designed specifically with accident and emergency in mind
- Introducer needle
- 28 trocar tip
- Single patient use

**Portex Mini Trach Kits**

- Seldinger insertion type chest drain
- Minimally traumatic - No trocar
- Lower rate of complications
- Reduced size
- NSN: 6515-99-811-0449

**Surgical Scalpels**

**Portex Frontline Chest Drain**

Portex Soft Seal Laryngeal Mask

- This single use Portex Soft Seal Laryngeal Mask comes in individual pre-sterilised packs. It provides many benefits to the ‘medic’ including elimination of the risk of cross infection between patients and allows easy access for flexible fibre optic guided placement of endotracheal tubes, smooth one-piece mould design including integral inflation line and features the exclusive Portex Soft Seal Cuff which reduces nitrous oxide diffusion.
- Better infection control - research has shown that even thoroughly cleaned reusable airway devices still contain residual protein deposits which have the potential for disease transmission*. Supplied in individually pre-sterilised packs.
- Ease of access - the Portex Soft Seal Laryngeal Mask is designed to avoid the risk of blockage without the need for obstructive epiglottis bars, allowing easy access for flexible fibre optic devices and flexible fibre optic guided placement of endotracheal tubes.
- A clear view - with the translucent tubing of the Portex Soft Seal Laryngeal Mask, condensation is clearly visible to confirm correct mask placement and blood, secretion or regurgitated gastric contents are easily visualised.
- Smooth one piece mould design - allows easy insertion and positioning. With no ‘step’ between tube and shoe and an integral inflation line, the Portex Soft Seal Laryngeal Mask is easy to insert and reduces the risk of damage to the line.
- Soft Seal cuff - the Portex Soft Seal Laryngeal Mask features the exclusive Soft Seal cuff, which is less permeable to nitrous oxide than that of reusable masks, reducing pressure rise and minimising potential trauma.

i-gel Single Use Supraglottic Airway

**Features and benefits**

i-gel gas a host of features that provide significant benefits to the patient and clinician.

- **i-gel Natural Airway Management**
  - The i-gel is a truly unique airway device and represents the culmination of years of extensive research and development.
  - Everything about the i-gel has been designed to work in perfect unison with the anatomy; the i-gel design was inspired by the physiology of the perilymphagal framework itself - airway management as nature might have intended.
  - The shape, softness and contours accurately mirror the perilymphagal anatomy to create the perfect fit.
  - This innovative concept means that no cuff inflation is required.
  - The i-gel works in harmony with the patient’s anatomy so that compression and displacement trauma are significantly reduced or eliminated.

- **The non-inflatable cuff**
  - i-gel gets its name from the soft gel-like material from which it is made. It is the innovative application of material that has enabled the development of a unique non-inflatable cuff. This key feature means insertion i-gel is easy, rapid and consistently reliable. Using i-gel; the simple, safe and rapid solution i-gel is incredibly easy to use. A proficient user can achieve insertion of the i-gel in less than 5 seconds. No inflatable cuff, i-gel provides a safe and rapid airway management solution.

- **Innovative packaging**
  - The i-gel supraglottic airway is supplied in an innovative colour coded polypropylene ‘cage pack’. This unique packaging protects the i-gel in transit and ensures that it maintains its unique anatomical shape.

**i-gel Supraglottic Single Use O2 Resus Pack**

Four things in one pack, one less thing to think about.

In emergency medicine, you need equipment that’s easy, rapid and reliable to use. The i-gel O2 Resus Pack contains everything you need to prepare, insert and secure the i-gel O2 quickly and efficiently: an i-gel O2 supraglottic airway, a sachet of lubricant, airway support strap and a suction tube. The i-gel O2 incorporates a supplementary oxygen port and an integral hook ring for securing of the airway support strap.

Includes:

- i-gel O2 Supraglottic Airway
- Sachet of lubricant – for quick and easy lubrication of the i-gel O2 prior to insertion
- Airway support strap – to secure the i-gel O2 in position
- 12 FG suction tube – for insertion through the gastric channel to empty fluid from the stomach

Veinlite EMS Pro Portable Vein Finder

The world's best selling vein access device just got better, with the new integrated white exam light.

Veinlite's unique C-shaped design stretches the skin for easy needle insertion, prevents veins rolling and results in fewer IV access failures. Using Veinlite saves time, avoids repeated needle sticks, decreases patient pain and anxiety and reduces wasted IV supplies.

- Clinically proven Veinlite technology
- NEW - Integrated exam light
- Robust design for use in the field
- Works on dark and light skin tones
- Uses any standard AA batteries
- Simple, single button operation
- 24 Bright Light Emitting Diodes (LEDs)
- Two LED colours optimized for vein imaging
- 12 Orange LEDs for superficial veins
- 4 Red LEDs for deeper veins, darker skin
- 8 White LEDs for examining
- Light shield and paediatric adapter
- Includes single use barrier covers
- Includes 2 AA batteries

• The EZ-IO Intraosseous Infusion System is a complete solution for immediate vascular access — whether you're facing difficult vascular access challenges or need immediate intraosseous access for critical situations and life-threatening emergencies.

• EZ-IO provides the medical professional immediate vascular access to the central circulation within seconds, delivering medications, intravenous fluids and blood products to adult and paediatric patients alike.

• In the pre-hospital environment, time is everything — and in many scenarios, peripheral IV access can be difficult or time-consuming, EZ-IO provides an ideal solution.

• Can be used to quickly establish stable and secure vascular access in less than 10 seconds — for adults and children, awake or unconscious.

• With a specially designed cutting IO needle and small power driver, the EZ-IO allows the clinician complete control — avoiding the use of force.

• EZ-IO provides rapid, smooth entry into the bone's medullary cavity, creating an immediate conduit to the central circulation.

• The EZ-IO Intraosseous Infusion System is the leading choice for intraosseous access across multiple health care settings.

• Used by 90 percent of US advanced life support ambulances, over half of US Emergency Departments, and the US Military.

• EZ to use, EZ to train and EZ to maintain, EZ-IO is the preferred choice of intraosseous access for medical professionals and the best method for gaining immediate vascular access.

SP Maternity Delivery Pack

- Uniquely developed by the Medics at SP to a high specification
- Designed to assist in the safe delivery of babies in and out of a hospital setting
- All contents sealed in one sterile pack
- Contents includes:
  - 2 x Bag Yellow Folded 45 x 29cm + Adh Lip
  - 1 x Bag Plain Top L 250 x 100 x 380mm No Autoclave Spot
  - 1 x Basin Placenta 3000cc
  - 4 x Clamp Umbilical Cord (Hollister)
  - 1 x Forceps Grip Plumb Blue 128mm
  - 1 x Glove Exam Powder Free Latex Walleted - Medium
  - 1 x Glove Exam Powder Free Latex Walleted - Large
  - 1 x White Apron 27 x 46" Folded to 9 x 16cm
  - 1 x Maternity Pad Unlooped C3 Helen Harper
  - 10 x Swab Gauze XRD 10 x 10cm 16ply
  - 1 x Towel Dressing 50 x 45cm
  - 1 x Towel Scrime 48 x 40cm
  - 1 x Baby Wrap White Quilted 60 x 90cm
  - 1 x Drape, Obs/Gyn, Underbuttock x Without Pouch
  - 1 x Syringe Bulb 60ml

Sterile Bulb Aspirator

- Flat-bottomed syringes for aspiration and irrigation
- Sterile
- 2oz size

Sterile Cord Clamp

- Umbilical cord clamp
- Sterile
- Individually packed
- Quantity discount available

Sterile Mucous Extractor

- Unique mucus extraction using the ‘Safe-Ex’ block filter device
- Maximum protection for the user by irreversible blocking on contact with any aqueous fluids such as mucus

E-Z Scrub Brush

- Sterile single use scrub brush/sponge with nail cleaner

Gallant Preparation Razor

- No pressure is required for prepping
- Single use

Ampoule Opener

- A safer way to open ampoules
- Just insert ampoule twist and pull

Surgical Prep Razor

- Double blade safety razor
- Single use

Combat Application Tourniquet (C-A-T)

- The Combat Application Tourniquet (C-A-T) is a true one-handed tourniquet that completely occludes arterial and venous blood flow of an extremity in the event of a traumatic wound with significant haemorrhage.
- The C-A-T uses a windlass system with a free moving internal band to provide true circumferential pressure to the extremity. Once tightened and bleeding has stopped, the windlass is locked in place.
- A velcro strap is applied for further securing of the windlass during casualty evacuation.
- Quickly controls life-threatening extremity bleeding.
- Small and lightweight.
- Completely occludes arterial blood flow in an extremity.
- Fits a wide range of extremities.
- Provides true circumferential pressure.
- Cost effective.
- Self adhering band.
- Friction adaptor buckle.
- One handed windlass system.

### Special Operations Forces Tactical Tourniquet (SOFTT)

- The SOFTT is applied the same to an arm or leg - unlike other tourniquets that require you to learn two methods of application and implement the proper method when under stress.
- The SOFTT is constructed of quality, high strength materials.
- The tourniquet handle is machined from a solid piece of aircraft aluminum and maintains its strength in the most extreme temperature.
- The tri-rings are molded Acetyl, a high impact plastic that will also maintain its strength in extreme temperature.
- Safety set screw prevents accidental release of pressure during tactical patient movement.
- Dual locking rings provide a back up in the event of a broken ring.
- The SOFTT can be easily repaired if it is damaged - 550 cord, boot laces or zip ties can be used to replace the tri-rings.
- Proven to be 100% effective during US Army Institute of Surgical Research testing.

### Special Operations Forces Tactical Tourniquet (SOFTT-W) Wide - Black

- The result of two years research of user feedback and laboratory study and builds on the success of the original SOFTT.
- A true 1.5" tourniquet strap, providing a better compression pattern than most other tourniquets.
- Compact, robust and easy to apply.
- The SOFTT-W is easy to learn to use and is re-useable.
- High-strength, light-weight components are used throughout; ensuring reliability in the most demanding of circumstances and on the largest of limbs.
- Uses a high-strength aircraft aluminum windlass, virtually eliminating the risk of windlass failure.
- No velcro anywhere, so the SOFTT-W can perform effectively when wet, muddy, sandy or frozen.
- Quick-release, snap-lock buckle design, allowing rapid routing of the strap around trapped limbs without rethreading.
- Weighs only 90g.

---

### Treatment Prices

Prices exclude VAT and Carriage - Standard terms and conditions apply
SAM Junctional Tourniquet

- The SAM Junctional Tourniquet for hemorrhage control is designed to control bleeding where tourniquets would not be effective, such as with IED/Blast injuries or high level amputations
- The SAM® Junctional Tourniquet offers a simple design
- It is compact, easy to use (only four steps), and quick to apply (typically under 25 seconds)
- The Target Compression Device (TCD) is placed at or near the injury site and pumped up until the bleeding stops
- Two TCDs can be used to occlude blood flow bilaterally if needed
- The rugged design ensures that the device stays firmly attached to the patient during transport
- Designed to exceed MIL-STD-810g requirements
- In addition, the SAM Junctional Tourniquet is the ONLY junctional hemorrhage device FDA approved to stabilize pelvic fractures. Recent studies indicate that IED-type injuries often have associated pelvic fractures
- The patented buckle provides the clinically correct force every time, taking the guesswork out of tightening
- This is vital in high stress environments where over-tightening or under-tightening could potentially be harmful
- For pelvic fractures

The AAT - Abdominal Aortic Tourniquet

- The Abdominal Aortic Tourniquet (AAT) is the first device to provide stable and complete occlusion of flow of blood to the lower extremities
- It has 510(k) approval from the FDA for difficult to control inguinal haemorrhage
- It is applied to the mid-abdomen, tightened and inflated and may remain on for up to an hour safely
- Initially developed for military applications, the AAT is now being implemented domestically
- When in operation, the device is wrapped around the patient’s upper or lower torso and tightened using a windlass for stability
- It is then inflated using a wedge-shaped bladder that indicates when a sufficient pressure has been reached by displaying a green strip
- While originally designed to stop blood loss in the pelvis and upper legs by providing compression at the aortic bifurcation, it has also successfully been used around the upper body to stem a severe haemorrhage caused by a bullet wound

SWAT-Tourniquet - Stretch, Wrap and Tuck Tourniquet

- A unique and multipurpose dressing that uses a non-latex elastic band that stretches around an extremity and tucks into itself for hours of effective pressure
- Its name provides a description for usage Stretch, Wrap, and Tuck while the graphics on the band indicate proper tourniquet pressure
- Allows a more rapid means to control extremity bleeding and allows application higher into the groin and axilla than other tourniquets
- Its ease of application is one of its greatest benefits; individuals can effectively apply it in seconds with little to no prior training
- It can also act as an occlusive bandage, a pressure dressing, and as an elastic bandage
- The band has been applied thousands of times and used in the sub-zero temps of Antarctica and boiled in water with no strength degradation

**Prefilled Saline Flush Syringe**
- Code: PH/129
- Description: Saline Syringe 0.9% - 10ml £1.25

**EpiPen Auto-Injector**
- Code: PH/071
- Description: Adrenaline Auto-Injector 0.3mls of 0.3mg
- Description: for emergency allergy treatment
- Description: EpiPen and EpiPen Jr. are auto-injectors containing adrenaline (epinephrine) for the treatment of allergic emergencies
- Description: The adrenaline corresponds to the body’s own fast acting stress hormone and that is released when people get shocked
- Description: The adrenaline works directly on the cardiovascular and respiratory systems
- Description: The adrenaline counteracts a potentially fatal anaphylactic shock by rapidly constricting the blood vessels, relaxing muscles in the lungs to improve breathing, reversing swelling, and stimulating the heartbeat
- Description: This product may only be purchased by a UK registered healthcare professional

**Full Range of Approved POM Available**
- Link: [See www.spervices.co.uk/paramedic for details](http://www.spervices.co.uk/paramedic)
### Chest Seals

**Foxseal Crease Free Chest Seal**

- An occlusive dressing for the treatment of open chest wounds
- Designed for simple, consistent performance in the field as a tool in prevention and treatment of pneumothorax
- Advanced adhesive works on wet or hairy skin

## Halo Chest Seal

- Ideal for the treatment of open pneumothorax, this seal also prevents the development of tension pneumothorax resulting from gunshots, stab wounds, or other chest injuries
- Specifically designed for treating injuries with excessive bleeding, heavy perspiration, or very wet and extreme environments
- Creates an occlusive seal around wound
- A highly-aggressive hydrogel enables the HALO Seal to conform and adhere to all contours of the body and also prevents further contamination of the injury
- Packaged in a two-pack for treatment of both entrance & exit wounds
- Non-vented design that is oval in shape
- Puncture-resistant packaging with long shelf-life

IN/078 | MediHeat Warmer - 12 volt Including carrying Bag | £399.95
IN/079 | 240 volt Mains Transformer | £110.00

Infupak IV Warmer

- Revolutionary product combining heat pads and Flectalon thermal protection
- Designed to solve the problem of ‘cold fluid’ in intravenous therapy
- Provides instant protection of the whole IV unit
- Can raise the temperature of fluids between 1°C and 8°C across the range of temperatures from -5°C to +20°C
- Developed in conjunction with BASICS and UK ambulance services

Code | Item | Price
--- | --- | ---
IN/074 | Infupak IV Warmer | £82.45

Instant Heat Pack

- Instant, reusable heat pack
- Ideal for warming IV fluids or for treating muscular injuries
- Just reheat in a saucepan to reset

Code | Item | Price
--- | --- | ---
IN/073 | Instant Heat Pack | £12.95

Pressure Infusion Cuff

- An inflatable device to aid IV infusion delivery speed
- Large scale accurate pressure gauge
- Simple valve for rapid deflation
- Strong fine mesh front for excellent visibility
- Fine adjustment of air pressure is available by using the valve
- All component are available as spare parts - call for details

Code | Item | Price
--- | --- | ---
IN/071 | Pressure Infusion Cuff for 500ml of IV fluid | £52.65
IN/072 | Pressure Infusion Cuff for 1000ml of IV fluid | £49.99

**Telford Extrication Device**

- Designed by Emergency Personnel
- Simple and effective spinal immobilisation
- Designed to be used with an extrication collar
- Supplied with carry bag, neck pad, head & chin straps
- Can be used on pregnant or paediatric patients
- Spare head & chin straps available
- Strong straps and battens ensure total unit integrity
- Suitable for use with cardiac monitors/defibrillator
- Vinyl construction making it impervious to body fluids and easy to clean
- Colour coded straps for easy and rapid extrication
- Velcro™ on head end to allow easy application & adjustment of head straps

**Stifneck Select Cervical Collar**

- Stronger oxygen mask / nasal cannula hooks for securing supplemental oxygen devices
- Now includes new integrated fastener for the Velcro® strap – an industry first
- With no glues or adhesives in-use on any of the Select adjustable products, the in-molded hook will enhance the performance of the collar in various environmental conditions.
- Locks ensure selected sizes stay in place
- Adjustment tracks ensure symmetrical alignment of size
- Uses the same sizing and application method as the original
- Stifneck collars
- Easy access for pulse checks, advanced airway procedures and visualization through oversized trachea hole
- Room for large fingers to slide through the rear panel opening for cervical palpation
- Directions moulded into collar
- Reduces inventory costs and saves space
- X-ray translucent and CT/MRI compatible

**Cervical Extrication Collar Carrying Bag**

- Allows up to 12 collars to be stored flat
- Clearly marked Cervical Extrication Collars
- Wipe clean materials - Infection control friendly
- Blue TPU Coated Polyester - lighter than PVC
- More durable, better tear resistance and better cold/crack resistance than PVC
- Water resistant
- Designed in the UK with the CQC in mind
- Conforms to ISO 13485
- REACH compliant - fully environmentally friendly
- Reflective checked pattern for increased visibility
- Dimensions: 61 x 25 x 12cm

**Ferno Pedi-Mate Child Restraint System**

- The Ferno Pedi-mate Child Restraint System is safe, comfortable, versatile... and it fits a wide range of Ferno trolleys
- Safety is paramount when children are being transported... but the right harness system should offer you more than just this
- Your chosen system needs to support children of a relatively broad age and weight range, avoiding wasting money and storage space on multiple harnesses of varying shapes and sizes
- Restraints need to be secure but also comfortable, so the child doesn’t feel restricted. Durability and hygiene are also important
- It’s easy to use, comfortable and rolls up for easy storage – the ideal harness system to fit a wide range of Ferno trolleys
- Secure but uncomplicated – five-point harness system clips snugly in place with adjustable straps
- Quick and easy to use – restrains the child securely and comfortably
- Versatile – three fully adjustable restraint straps to hold children from 4.5kg to 18kg
- Safe and hygienic – made from non-toxic, easy-clean vinyl
- Storage – a bag is supplied for the Pedi-Mate strapping system for safe storage

Ambu Head Wedge

The Ambu Head Wedge is a disposable device capable of keeping the patient’s head immobilised to any backboard. Symmetrical side panels – both engage at the same time. This device is easy to use and is completely waterproof. Radiolucent, CT and MRI compatible. Stores flat. Side panels adjust up for perfect fit. Side panels keep head from shifting on board. Both panels stay same height. Plastic construction – Latex free. Directions located on product.

CombiCarrier II Head Immobiliser

- Designed to be used with the CombiCarrier II, this head immobiliser allows easy operation of the latch mechanism on the CombiCarrier II during application and removal from the patient.
- Compact, tapered head supports minimise lateral movement and maximise access to the patient’s neck and ears without compromising stabilisation.
- Simple to use and easy to clean.
- X-Ray translucent.
- Base plate can be left on the device when stored, saving valuable on-scene time.
- Also fits on many 16” width backboards common in the industry today.

Straps and Restraints

Spider Straps

- The original and still the best
- The Spider Strap is unmatched for ease of use and effective immobilisation
- You can quickly and securely strap your patient to a backboard or stretcher in seconds, time after time
- Polypropylene: multi-colour
- All black version available to special order

Casualty Securing Straps

- Simple and easy to use - no knots or ties
- Multi Purpose - use as Bandages/Slings/Splints
- Strong - Durable - Re-usable
- Cost Effective - Replaces less efficient & consumable First Aid Equipment
- Minimal Training Needed - Reducing training cost and lost man hours
- Efficacy in application and treatment
- Quick and Easy for Self Application - Ideal for people alone in remote areas
- Can be lengthened - Simply join together along the full length of the fastening
- Broaden by simply placing side by side
- Lightweight and Compact - for carrying and storing
- Simply part and re-fasten for instant adjustability

## Transportation

**Spinal Immobilisers**

### Ferno Scoop 65 EXL
- Ergonomically designed from high strength aluminium and precision mouldings allowing light weight with considerable strength
- 4 BioThane straps and speed pins to quickly secure a patient to the scoop
- Allows easy access to awkward low spaces and makes movement of the body easy in confined areas
- Can be split into two easy to handle pieces
- Narrow foot end frame for handling in confined spaces
- Oval profile and angled handles provide ergonomic ease of use
- X-ray translucent
- Twin safety lock hinges allow fast uncoupling of one or both ends
- Four length options accommodate patients of different heights
- Seamless construction makes cleaning easy
- Thermally treated material does not get too hot or cold, allowing greater patient comfort
- Made from lightweight, high impact, composite materials
- CEN compliant
- Dimensions: 43 x 168-201cm, 120cm when folded
- Weighs 8kg, max load capacity of 159kg

Mantis Tri-Fold Backboard

- The Mantis Tri-fold Evacuation Board represents the ultimate in simplicity and durability
- It is ideal for vehicle extraction because of its compact size and rapid employment - it takes just seconds to fold out and make ready for use
- The Mantis is made of light weight aluminum and has zero risk of fire hazards, cracking, warping and gouging that’s common with plastic and composite boards in tactical and vehicle operations
- The Mantis has recently passed operational testing by U.S. Special Operations Command (SOCOM) and is the official backboard of record integrated into the U.S. Department of Defense, Tactical Combat Casualty Care (TCCC) and Casualty Evacuation (CASEVAC) sets
- Dimensions: 183 x 40cm unfolded, 63 x 40cm folded
- Weighs 5.8kg
- Max Load: 227kg

Ultra Spac-Sav Folding Spineboard - Blue

- Compatible with all standard head immobilisers
- Folds neatly so it takes up half the space of standard backboards
- Constructed with our exclusive stainless steel mechanical pivot and internal aluminium runners
- Durable HDPE shell does not reflect extreme temperatures ensuring superior patient comfort over metal folding stretchers
- Great for use in Paramedic Response Vehicles, 4x4s, or any other location where storage space is limited
- Subtle surface texture prevents slippage but is easy to clean and disinfect
- Twelve oversized hand-holds will accommodate gloved hands
- Dimensions: 183 x 40cm unfolded, 91 x 40cm folded
- Weighs 9kg, Max Load: 226kg

**Reeves® Sleeve**

- The Reeves Sleeve can be combined together with an existing spineboard to create a new cost-effective confined space immobilisation tool
- Conforms with OSHA standards dealing with emergency rescue equipment in confined space and construction
- Designed for rapid patient immobilisation in spinal and neck injuries
- Constructed of 0.5kg vinyl laminated nylon
- Resists acids and stains, easily decontaminated
- Helicopter hoist capability
- Lightweight compact design - 6kg
- Assists in spinal immobilisation with patient comfort and safety
- Load capacity of 682kg with spineboard
- The patented Reeves Sleeve is a complete patient packaging in an easy to store format
- Dimensions: Opens - 185 x 61cm
- Dimensions: Folds - 61 x 30.5 x 13cm

**Talon II Folding Combat 90C**

- The most advanced and innovative combat and evacuation system ever designed
- Exceeds military 3X decontamination requirements
- Meets civilian and military fire safety codes
- Compatible with NATO patient evacuation platforms, including UH-60 carousel
- Ergonomically designed handles
- 6 IV pole attachment points
- Center piece
- Ground clearance of 3.8cm
- 2 patient securing straps
- Slip-resistant and rip-stop pattern fabric
- Automatic locking hinges
- Dimensions 205 x 57 x 15cm
- Folded dimensions 52 x 18 x 15cm
- Weight 6.8 kg
- Load capacity 545.5 kg

Paraguard Excel Rescue Stretcher

- Designed for a variety of rescues, the Paraguard Excel is a compact and versatile articulating rescue stretcher. It is ideal for search and rescue operations and weighs just 16kg and can be used to rescue casualties from building collapse, industrial incidents or confined spaces. The Paraguard Excel has been developed from the popular Paraguard MKIII to provide a superior rescue stretcher.
- Compact, quick to apply and versatile
- Ideal for collapsed buildings, industrial or confined space rescue, particularly useful for high building and helicopter rescue
- Quality synthetic material, stainless steel and aluminium alloys, make the Paraguard impervious to oil, water, grease and other petroleum products
- Non-perishable and corrosive resistant
- When moving in awkward spaces the unique construction allows the centre of the Paraguard to unlock and bend
- For fast deployment new speed links enable the stretcher to quickly unfold when removed from storage
- Straps secure the chest, arms, thighs and lower legs. The head is held in place by a 3 point, non-slip forehead strap. A figure of eight strap supports the feet
- Comes with a bag for simple storage and ease of transport
- Dimensions: Length 183cm
  Width 25cm
- Maximum Load: 136kg

SLIX 100 Rescue Stretcher

- Robust, compact and lightweight stretcher
- ST/180 comes complete with carry bag and horizontal and vertical lifting straps
- Flexible and smooth allowing easy sliding
- Stretcher to be rolled width ways or lengthways to facilitate transport
- No webbing passes under the stretcher, preventing damage whilst dragging
- Strong handles allow it to be manoeuvred by several rescuers
- Vertical and horizontal hauling options
- Secure lifting straps mould the stretcher around the casualty
- Neutral buoyancy which allows it to float
- SWL - 150kg, bariatric version SWL - 300kg
- Designed to be used with an ABT3 two person rescue tripod:
  - The tripod is the basis of a confined space entry and rescue system giving a strong, stable, and portable anchorage point for fall arrest and recovery systems
- Sturdy and lightweight
- Can be carried and erected by one operator
- For tripod stability, the tripod legs may be individually adjusted
- 6 anchor points tested to EN795
- 3 overhead pulleys hold up to 11mm rope
- The extra anchor points may be used with pulleys for a double roped rescuer, back-up system, airlines, communication lines, medical kits, tool kits etc

Transfer discs are beneficial in reducing the potential for damage to the backs of nurses and carers whilst moving patients.

By allowing smooth, controlled rotation on a non-slip surface they eliminate potentially dangerous jerks and twists which can damage a patient’s weak limbs or joints.

Maximum user weight 125kg (19.5st)

Diameter: 41cm, Weight: 1kg

This comfortable and supportive belt

Ergonomically designed handles

Helps a person from sitting to standing and vice versa, walking and helping whilst transferring on a sitting transfer board.

Fully washable at 71°C and can be tumble dried on a low/medium heat

Upper sitting balance required

Universal size will fit 60 - 125cm waist

Not to be used for lifting

Thomas Bariatric Transfer Carrying Sheet

Accommodation most backboards and qualifies as a spinal immobilisation device.

Ten outside ergonomic handles allow for even distribution of weight.

Designed to roll up and be self contained

Simply un-buckle, un-roll, slide in your backboard and your ready to go

Easily cleaned with soap and water - no Velcro

For EMS professionals, most back injuries occur while lifting.

The Thomas Handle is designed to reduce the amount of bending when lifting a backboard by adding approximately 12 inches to the lifting point

Reduces back strain, eliminating awkward lifting angles, and minimising abrasions on the hands and knuckles.

Attaches to any backboard

Single Patient Use Glide Sheet

High performance single-patient-use roller slide sheets

Strong, robust and sliding superbly on either side

Ideal for repositioning up and down in beds/trolleys, turning, swivelling and transferring.

Patient Flat Transfer Sheet

This range of Flat Sheets is popular where staff want the versatility of the two flat sheets but do not want to use handles in the right hands, they offer a phenomenal level of versatility.

Transportation

Donway Manual Handling & Lifting Kit including Banana Board

The Donway Manual Handling & Lifting kit is the ideal solution for providing safe and effective patient handling. Commonly used by NHS and Private Ambulance Services as well as Falls and Crisis Response Teams.

The kit consists of:

**Transfer Turntable (Load limit 115 Kg)**
- Strong but lightweight Transfer Turntable
- Full 360 degree turning circle and a gripped, anti slip, upper surface for added user safety & security.
- An invaluable aid for a carer or relative, providing a smooth, easy and constant rotation when transferring a user to and from a bed, chair, commode or car etc. without the need to move their feet and legs.

**Transfer Lifting Belts (Small, Medium & Large)**
- Designed to assist the person getting out of their wheelchair, bed, chair or transferring from short distances.
- Four webbed handle grips for additional safety when transferring.
- Belts can be adjusted and buckled around the person’s waist enabling the carer to reach the webbed handle.
  - Small Transfer Belt - 68 x 94cm
  - Medium Transfer Belt - 85 x 112cm
  - Large Transfer Belt - 90 x 119cm

**Tubular Glide Sheets (Medium & Large)**
- A useful aid to carry out tasks such as repositioning patients in bed
- Helps caregivers to perform their jobs with greater comfort and safety, preventing strain injuries due to low friction.
- Washable and reusable
  - 2 x Tubular Glide Sheet - 200 (H) x 72cm (W)
  - 1 x Tubular Glide Sheet - 70 (H) x 72cm (W)

**Banana Board (Load limit: 200 Kg)**
- A patient transfer board designed for patient movement when seated
- Low friction, sliding surface for swift and easy movement
- Curved shape, suitable for lateral transfers either unassisted or with the help of others

**Carry Case**
- Durable carry case with multiple internal sections
- Neatly secures equipment safely until required

FareTec CT-6 Leg Traction Splint

- Designed for Pre Hospital Care and Patient Transport, specifically in combat scenarios
- It is primarily used on patients with mid-line femur fractures
- Helps relieve patient pain and prevents further damage to surrounding muscle and tissue while reducing the risk of death caused from severed arteries
- Made of carbon tubing which snaps together via an internal bungee
- A Cobra buckle secures the Ischial strap to the upper leg and groin
- These buckles prevent accidental releases and are commonly used by US military forces
- Traction is achieved with a 4 to 1 purchase system using a small line to apply tension
- A very precise and delicate form or traction that is also powerful enough to be effective on extra large adults
- Extremely compact, light and strong
- Light - Unit weighs only 500g
- Unit fits in small synch bag, 28 x 10 x 7.5cm
- Includes Molle compatible bag
- Strong carbon fiber poles and injection molded plastics
- One unit fits both adult and paediatric patients

Casualty Securing Straps

- Simple and easy to use - no knots or ties
- Multi Purpose - use as Bandages/Slings/Splints
- Inexpensive
- Strong, durable and re-usable
- Cost Effective - Replaces less efficient & consumable First Aid Equipment
- Minimal Training Needed - Reducing training cost and lost man hours
- Efficacy in application and treatment
- Quick and Easy for Self Application - ideal for people alone in remote areas
- Can be lengthened - Simply join together along the full length of the fastening
- Broaden by simply placing side by side
- Lightweight and Compact - for carrying and storing

Sager Traction Splint - Model 304

- Fast, easy, fail-safe traction device
- Sager Emergency Traction Splints apply countertraction against the ischial tuberosity medial to the shaft of the femur in a manner consistent with the original Thomas Full and Half Ring Splints
- Uses the same manner of traction and countertraction applied to patients in operating room theatres undergoing surgical reductions and repair
- As with surgical procedures, Sager’s application of traction avoids point pressure on the sciatic nerve and related vascular structures — in the critical proximal third of a femoral fracture
- This same feature makes the Sager indicated for treatment in 93% of all femoral fractures!
- Provides alignment, stability and pain relief
- Engineered for first responder treatment
- Allows traction to be applied to a single leg or both legs together

Slishman Traction Splint

- Developed to overcome many of the design limitations of conventional traction splints
- The innovative STS design has the traction mechanism positioned at the patient’s hip
- Femur traction is applied through the extension of the pole segments creating a pushing force on the ankle strap instead of pulling distally from the foot
- One size for both adults and paediatrics
- Anatomically contained from the patient’s hip to ankle and does not extend outside backboards, litters, and stretchers
- Rapid patient application with no poles or mechanisms to set up
- Lightweight - only 590g
- Radiolucent
- NSN: 6515-32-083-5266

The SAM Sling™ effectively reduces and stabilizes unstable pelvic fractures. It can be quickly and safely applied on the scene, before transport or in an emergency department.

The SAM Sling™ is a reusable, non-invasive, easy to use device, which can be applied by paramedics at the accident scene to individuals who have, or are suspected of having a pelvic ring or lateral pelvic fracture.

The SAM Sling™ is the first and only pelvic belt or binder to contain a buckle programmed to engage when the correct, safe amount of constrictive pressure is applied. This protects the patient from further injury and allows for safe application on scene by EMS personnel.

Pelvic-ring fractures are associated with a high mortality rate of up to 25%, mainly due to internal bleeding. The recommended method of dealing with a suspected open book pelvic-ring fracture is circumferential compression of the pelvis with a sheet or belt. This method (performed correctly) will greatly stabilise an open book pelvic fracture and therefore constitutes an effective means to control a life threatening haemorrhage.

Research showed the unique SAM Sling™ Belt was highly effective in reducing and stabilizing unstable open book pelvic fractures. The SAM Sling™ is first placed under the buttock region at the level of the greater trochanters and then circumferentially tightened by pulling in opposite directions on the anterior handles. An innovative Buckle provides force and audible feedback when the circumferential pull-force has reached 150N (33lbs), at which point the belt is fastened to maintain optimal reduction and stabilization.

The Sam Sling™ is radiolucent and padded for comfort. The anterior section of this device is sufficiently narrow to allow for examination, catheterisation and access to the femoral vessels. The Sam Sling is reusable and can be cleaned with common detergents or anti-microbial solutions.

The SAM Sling™ has been researched and clinically proven to be effective on a range of subjects weighing 132 - 229 lbs. (60 - 104 kgs). It is not recommended for children.
Acclaimed by emergency care providers and outdoor activity centres worldwide, the 
SAM® SPLINT is based on a universally recognised engineering principle: curves are 
strong.

Built from a thin core of aluminium alloy, sandwiched between two layers of closed-cell 
foam the SAM® SPLINT is extremely mouldable, and soft enough to cut with ordinary 
household scissors. Yet when bent into any of three simple curves, it becomes extremely 
strong and supportive for any fractured or injured limb.

With the proper choice of curves almost any bone in the body can be splinted. It’s even 
possible to use the SAM® SPLINT to create an emergency cervical collar for neck injuries.

**Upper Extremities & Neck Splints**

Finger Splint, Thumb Splint, Short Arm Wrist Splint, Ulnar Gutter Splint, Double layer Wrist Splint, 
Sugar Tong Splint, T-Beam Wrist Splint, Dislocated Elbow Splint, Upper Arm Splint, Adjustable 
Collar Splint

**Lower Extremities Splints**

Ankle Stirrup Splint, Figure 8 Splint, Combination Ankle & Figure 8 Splint, Single Long Leg Splint, 
Double Long Leg Splint, Knee Immobilizer Splint

• Closed-pore, impermeable foam surface allows for easy cleaning
• Can be remodelled and reused
• Extremely lightweight and compact (113g for 91.5 x 11cm)
• Waterproof / does not absorb bodily fluids
• X-ray translucent
• Not affected by extremes of temperature
• Washable
• Available in 5 different sizes
• Training DVD available

Mediwrap® is an innovative textile made into single use products with a comfortable, soft inner lining and an insulating, windproof and waterproof outer layer. Designed to arrest hypothermia and stabilise patient temperature, it is able to absorb in excess of ten times its own weight of body fluids whilst keeping the patient warm and dry. The material also acts as a total barrier to bacteria, protecting paramedics from cross infection caused by previously used bedding.

Evac+Chair 500

Evac+Chair is a universal evacuation solution for smooth stairway descent during an emergency. This single user operation ensures no heavy lifting or manual handling is required during emergency evacuation procedures.

- A two person operation enhanced
- Evac+Chair with an increased passenger payload capacity of 500lbs/227kg
- Uses basic principles of gravity and friction, not gadgets. There is no installation. It’s always ready for immediate on-the-job protection
- For use on steep stairs (45°)
- Easy to Use
- Lightweight
- No heavy lifting required
- Includes Patient Restraints Photo Luminescent Signage Wall Mounted Hooks Dust Cover Fold away lower grip handle Foot rest
- Dimensions
  Height: 120cm
  Width: 52cm
  Depth: 22cm
- Weight: 13kg (unladen)
- Payload Capacity: 500lbs/227kg

Saver Safe Evacuation Chair

Are you equipped to deal with a building evacuation situation?
Do you conform with the Regulatory Reform (Fire Safety) Order 2005 (FSO), the Equality Act 2010 and the Disability Equality Duty (DED, applicable to public bodies)? If you cannot evacuate disabled personnel then the answer is NO! The Saver Safe Evacuation chair is a simple and effective solution.

- The Saver Safe Evacuation chair is a single user operation emergency evacuation chair
- Glides down stairs easily and smoothly to ensure no heavy lifting or manual handling is required
- The Saver Safe Evacuation chair is the total solution for any emergency evacuation situation
- Lower, adjustable easy-grip handle for operator control and comfort
- Lightweight, with a compact profile for easy storage and use
- Seat attached all round, allowing easy lateral patient transfers
- Removable, adjustable head pad and comprehensive patient restraint systems to enhance patient comfort and safety
- Supplied with wall bracket, cover and sign
- Dimensions:
  Width: 527mm
  Height: 1334mm extended
  927mm retracted
  1030mm folded
  Depth: 914mm overall

### Bastion Uniform

#### Bastion Tactical Long Sleeve Shirt

- Polycotton Material - lightweight but strong, and has a ripstop construction. This helps to make the fabric resistant to tears and abrasions
- Two chest pockets - slightly bellowed with Velcro closures
- Two large hidden pockets
- The Eclipse Epaulette - If you need to be identified you can attach slider epaulettes, but if you are undercover or off duty you can just hide the epaulettes

For Doctor, Nurse & Paramedic badges, your certificate/pin number will be required
The Univisor provides clear identification for emergency services and highly visible temporary marking for vehicles.

Used extensively by various emergency services worldwide including Police, Fire, Search and Rescue, Ambulances, Doctors, Paramedics, Nurses and First Responders. Univisor’s huge range of visors are perfect for marking any emergency vehicle that may be out of service or just out on test, also a great idea for unmarked police cars, CID officers or anyone who has to use their own car for working within an emergency or rescue service.

**Univisor**

Made to patented design
Fits most vehicles
Simply slides over existing vehicle’s sun-visor
No fixing brackets or sticking
Hidden / removable when not in use
Tested to International DIN standard for in-car items
Recyclable, washable, UV stable, shatterproof, fireproof
Printed with 3M retro-reflective letters
Wide range of colours

<table>
<thead>
<tr>

The LED Univisor is an illuminated visor sign that clips to the passenger sun visor and identifies vehicles when needed, at incident scenes, crimes scenes and accidents, covert operations, on tests, out of service, when parking or in traffic, access to secure or controlled areas.

Featuring 90 super-bright white LED's, powered by a 9-12v cigarette lighter socket, this illuminated LED Univisor gives enhanced visibility when compared to the standard Univisor.

Easily removed or hidden when not in use, by simply folding away the vehicles standard visor.

The LED Univisor fits all standard vehicles.

The main wiring can be tucked away and the sign is easily disconnected from an adapter close to the sign, for easy removal when not needed.

It is recyclable, washable, UV stable, shatterproof and fireproof.

Heat and fade resistant under conditions of heat and sunlight.

Any lettering can be printed.

The perfect protection accessory for law enforcement, ambulance staff and security personnel

TurtleSkin fabric has the world’s tightest weave which means it can be light, breathable and almost impenetrable at the same time.

TurtleSkin has many varied uses, from puncture resistant protective clothing to more sophisticated body armour used by emergency personnel and the military. So diverse are its uses it was even used as part of the NASA’s Mars landing vehicle to protect it on landing on the rough surface of Mars.

TurtleSkin is a patented fabric using an ‘Aramid fibre’ that is woven more tightly than other materials. The result is a very thin, flexible, cut and puncture resistant material which helps protect against needle stick, metal shards and glass fragments. With a thickness of less than 3 sheets of paper, TurtleSkin gloves offer a superior level of dexterity for environments where grip, precision and control are demanded.

For more information on our range of TurtleSkin products including a demo video, please visit our website www.spservices.co.uk/turtleskin

TurtleSkin WorkWear Plus Gloves

- The perfect hand protection for anywhere you may encounter a sharp
- Designed for tasks that require great grip, dexterity, tactile sensitivity and cut and puncture resistance
- These leather work gloves have a stretch-knit backing and a Velcro closure at the wrist for better fit and excellent comfort
- Offers a palm side Aramid lining for even more cut and puncture protection

TurtleSkin InsiderPlus

- The TurtleSkin InsiderPlus can be worn under a disposable glove for unrivalled puncture/cut protection
- Cut and puncture protection for the palm side and fingers
- Increased puncture and cut protection on the palm
- Can also be used with a disposable outer glove
- Lightweight cotton glove with 100% Aramid TurtleSkin® protection

The Cromwell Dual Helmet system features two helmet shells that can be integrated into one helmet. The base helmet - the ER1 is for emergency and rescue operations that do not require a structural fire fighting helmet.

- Unique dual helmet system
- Complies with international standards
- ER1 is a level 1 Emergency and Rescue Helmet with adjustable headband and retractable goggles
- Suitable for paramedics, civil defence, RTA, police, security, special ops and rescue personnel
- Manufactured using the latest moulding techniques
- Developed to meet the requirements of the planned UK Fire Services Integrated Clothing Project (ICP)
- Outer FR2 Fire and Rescue shell also available - fits easily over the ER1 Helmet in seconds
- Visit the SP web site for further details
- Contact customer services if you are interested in other colours or the optional FR2 outer shell

Tracerlite Tactical Footwear is now available in Europe.

Tracerlite has become the leading provider of duty footwear in Australia and New Zealand for Police, Prisons & EMS.

Tracerlite has a mission to build environmentally sustainable, lightweight performance footwear that combines function and fit. To prove our environmental credentials our footwear is one of only a very few specifically tested by the UK Shoe & Allied Trades Research Association (SATRA). Tracerlite Boots will not fail to satisfy the user.

Rigorous control of supply channels, manufacturing and Quality Assurance ensures that Tracerlite have entered the European market with quality footwear that is being used daily in harsh conditions with many 1000’s of satisfied users and that are Tested and Certified to CEN ISO Standards.

Comfort for Emergency Personnel begins from the feet upwards.

Ecolite Bamboo Socks - Tactical Black

- Ecolite Bamboo Socks are essential equipment and the perfect partner for your Tracerlite and Magnum tactical boots.
- Built for comfort and made to fit, Ecolite Bamboo Socks are manufactured from ultra fine Bamboo fibre, with superior wicking ability and anti-bacterial properties. Ecolite Bamboo Socks eliminate foot odour promoting good foot health.
- Ecolite Bamboo Socks offer more comfort and blister protection than any other available sock on the market.
- Bamboo fibre construction
- Superior wicking promotes foot health
- Natural anti-bacterial fabric which eliminates foot odour
- Ultra fine fibre for more comfort and blister protection

**SP’s MD Steve Bray says:**
“These socks are one of those products that I personally love and actually wear myself on a regular basis. They really are so comfortable and my feet really do feel less tired if I’ve had a hard day walking or a long day standing at an exhibition.”

Leatherman Raptor Rescue Shears

- The Leatherman Raptor Medical Shears feature the necessary tools for uniformed professionals to safely and quickly go to work in an emergency situation.

- Developed with the input of special operations medics, EMTs and fire professionals, the Raptor has just the right balance of multipurpose features for medical-specific ops without an overkill of tools to complicate sometimes life-threatening situations. When it’s a question of survival, the Raptor answers loud and clear.

- Stainless Steel
- Glass-filled Nylon Handle Scales
- MOLLE Compatible Injection-molded Polymer Holster
- Lanyard Hole
- Replaceable Pocket Clip
- 25-Year Warranty
- Shear Length: 4.8 cm
- Closed Length: 12.7 cm

**Yaktrax Walker Ice Traction Device**

- Yaktrax Walker ice grips in Black
- The most popular ice grips from Yaktrax
- Lightweight and comfortable to wear
- Easy to put on and take off when entering buildings or vehicles
- Yaktrax Walkers are ideal when you have no choice other than to walk on icy pavements
- Yaktrax ice grips are the ideal way to reduce the risk of slips and falls on packed snow and ice in the urban environment
- Made out of an injection moulded thermal plastic elastomer designed for easy on and off
- Extremely light weight, between 45g and 95g depending on size
- The 1.2mm steel coils are protected against rusting and hand-wound to give you 360 degrees of traction on ice and snow
- The steel coils include 70% recycled material, making them eco-friendly
- Yaktrax Walker ice grips can be worn in temperatures as low as -41 degrees farenheit
- The outer band conforms to the length and width of your boot or shoe
- The high strength horizontal coils provide forward and backward stability, the vertical coil pattern provides side-to-side stability

**Helios Water Rescue Throw Rope**

- Durable, mildew resistant throw bag
- Specially designed low friction floating rope
- Throw the bag and the rope plays out to the target
- Break-strain of 2000lbs

**Rescue Shovel**

- Ideal for rescue situations or domestic use
- Comes with blade and T-grip which separates into two parts for easy storage
- Small shovel dimensions: 24.2 x 91.7cm
- Standard shovel dimensions: 24.7 x 96.6cm

**Shelby Extrication and Rescue Gloves**

- A pre-curved, form fitting extraction glove designed by auto extraction specialists
- Anatomically designed glove body is made entirely of “air-textured” high-tenacity genuine DuPont Cordura
- This exceptionally durable, lightweight material is reinforced with Schoeller-Keprotec at all the high wear areas
- Additionally, glove has vented, form fitting protective rubber guards welded to the backs of all fingers, reflective trim, a brow wipe and elastic “snuggler” at wrist to repel debris
- The Shelby Extrication Glove is the only one of its kind to have a velcro Light attachment feature on back of hand making a flash Light just one less thing to hold in the dark!

FatIvan Door Chock

- The FatIvan door chock allows you to chock open any hinged door in seconds. This unique tool will work in the top, middle or bottom hinges so there is no messing around, just insert it in the hinge closest to you.

- Created to aid Emergency Service personnel who are tired of carrying wedges that rarely work or having bulky pieces of metal hanging out of their pockets and ultimately ruining their uniforms - No longer will they have to endure doors closing behind them or getting their hose lines pinched under doors

- Although this was primarily designed for emergency service situations the FatIvan has a host of applications where a door needs to be chocked, from removal firms to undertakers, the FatIvan is a must have tool

- Allows ambulance crew to easily hold a door open for quick stretcher or carry chair transit

- One-handed operation
- Opens quickly for insertion
- Never slips off a hinge, guaranteed
- Works on any door hinge
- Fold up and fits in a pocket when not in use
- Corrosion resistant plastic and zinc plated steel
- One handed insertion
- Folds up for easy storage
- Will not tear your uniform or equipment
- Compact and lightweight
- Dimensions: 10 x 5 x 2.5cm
- Weight: 142gm

Streamlight Septor LED

- The combination of brilliant LEDs in this headlamp places the Septor in a class by itself
- 7 LEDs: 70 lumens, 3 LEDs: 35 lumens, 1 LED: 13 lumens
- Its piercing light comes from seven super bright white LEDs each with a life of 100,000 hours so you’ll never replace a bulb again
- Requires 3 x AAA alkaline batteries (included)
- The LEDs provide 3 way, hands free lighting for short, medium, and long distances
- 90° tilting head lets you zero in on the source you’re illuminating
- Constructed of very high strength polymer
- Fully adjustable straps for the ultimate in hands free LED lighting

Streamlight Argo C4 LED Headlamp

- C4® LED technology, impervious to shock with a 50,000 hour lifetime
- Three (3) digitally controlled brightness levels:
  - High – Up to 1,300 candela, 56 lumens measured system output
  - Medium – Up to 575 candela, 25 lumens measured system output
  - Low – Up to 250 candela, 11 lumens measured system output
- Pushbutton switch – hold three (3) seconds for “blink mode”
- RUN TIME:
  - High: 7 hours continuous runtime to the 10% output level
  - Medium:12 hours continuous runtime to the 10% output level
  - Low: 20 hours continuous runtime to the 10% output level
- 90° tilting head
- Includes elastic head strap and rubber hard hat strap
- Powered by 3 AAA alkaline batteries; LED battery indicator on back

Streamlight Trident

- Includes three LEDs and a Xenon bulb in the same reflector
- Three-position lighting lets you select the best combination of lights for the task at hand
- Powered by 3 x AAA alkaline batteries (included)
- 300 mA Xenon bi-pin bulb, plus three 100,000-hour life LEDs
- Xenon Bulb: 12 lumens measured system output
- One White LED: 9 lumens measured system output
- Three White LEDs: 24 lumens measured system output
- 3-position lighting: 1 xenon bulb, 2 one LED, 3 three LEDs
- Spot to flood focus
- Adjustable elastic head strap and rubber hard hat strap
- 90° tilting head
Streamlight ProPolymer

- High-intensity xenon gas filled bi-pin bulb
- Rubber comfort grip on body and facecap
- 3,500 candlepower for 2AA version and 6,000 candlepower for 4AA version
- Durable, water resistant, with a virtually unbreakable polymer body and scratch resistant lens
- ATEX Approved

Streamlight SL-20LP

- Rechargeable torch with 12v DC charger
- C4 LED technology with a 50,000 hour lifetime
- Fully charges in 7 hours
- Select high, medium, low or strobe modes with multi-function switch
- Runs for 2 hours on high power, 4 hours on medium and 50 hours on low
- Unbreakable polycarbonate lens with scratch-resistant coating

Streamlight Stinger

- Rechargeable torch with 1 hour use between charges
- Includes 12v DC charger
- Xenon gas filled bi-pin bulb - includes spare in tailcap
- TO/319 constructed from machined aluminium anodised against corrosion inside and out

Streamlight Litebox

- Rechargeable torch with 8 hours use on an 8 watt light, and 3.5 hours on a 20 watt light
- High impact ABS thermoplastic housing, rubberised impact bumper, lens ring, and cushioned grip handle
- Includes 12v DC charger

Streamlight Survivor

- Rechargeable torch with 4.25 hours use between charges
- Includes 12v DC charger
- One hour fast charge or ten hour steady charge versions
- Spring loaded clip with built-in attachment ring works with belts and harnesses
- ATEX Approved

Streamlight Vulcan

- Industrial-duty, lightweight, rechargeable, waterproof; It's virtually indestructable
- Up to 3.25 hrs. continuous run time per charge
- 19 x 12.5 x 6.25 cm

Prices exclude VAT and Carriage - Standard terms and conditions apply
LED Lenser H7R.2 Head Lamp

- Advanced Focus System: Spot to Flood Beam focusing
- Tiltable lamp head – direct light where you want it
- Dimming function – set appropriate lighting strength and avoid dazzle
- Optimised weight/balance ratio: easier to wear
- Adjustable straps: adds to wearing comfort
- Belt pouch for storage when not in use
- Weight: 164g

LED Lenser M7R

- Smart Light Technology
- 2 Energy Use Modes - Energy Saving & Constant Current
- 3 Light Programmes – Professional, Easy, Defense
- 8 Light Functions – Morse, Boost, Power, Low Power, Dim, Blink, SOS, Defence Strobe
- Advanced Focus System: superior Spot to Flood Beam focusing
- Speed Focus: single-handed instant focusing
- Robust, yet lightweight, aircraft grade aluminium
- Splash and dust proof design – protects better
- Superior rear tail cap switch – controls Smart Light
- Gold plated contacts for better conductivity
- Hard case - for storage and protection
- Dimensions: 156 x 37mm
- Weight: 206g
- Power supply: Rechargeable Li-ion battery

Mag-Lite Torches

Mag-Lite C & D Size Torches

The Mag-Lite's distinctive torch design makes it practical for work or play. Whether in professional, rescue, sporting, home or automotive applications the diverse needs of industrial and personal use are uniquely met by the Mag-Lite commitment to inspired performance.

When conditions are less than perfect a torch shouldn’t be. That’s why Mag-Lite torches are really in their element in rain, snow, mud and even moisture. Which means you can take them camping, hiking, skiing, sailing, even to the beach without worry.

- High-intensity adjustable light beam (Spot to Flood)
- Rugged, machined aluminum construction with knurled design
- Anodised inside and outside for corrosion resistance and durability
- Water and shock resistant
- Spare lamp safely secured inside the tailcap

### Mag-Lite Mini and Solitaire Torches

- High-intensity adjustable light beam
- Rugged, machined aluminum construction with knurled design
- Anodised inside and outside for corrosion resistance and durability
- Water and shock resistant
- Spare lamp safely secured inside the tailcap
- Mag-Lite Mini torches convert quickly into candle mode in 3 easy steps

ANSI Icon Reference

- **Light Output**: Light Output is the total luminous flux. Light output in this standard is expressed in units of Lumen.
- **Run Time**: Run Time is defined as the duration of time from the initial light output value using fresh batteries, until the light output reaches 10% of the initial value.
- **Beam Distance**: Beam distance is defined as the distance from the device at which the light beam is 0.25 lux.
- **Peak Beam Intensity**: Peak beam intensity is the maximum luminous intensity represented in Candela.
- **Impact Resistance**: Impact resistance is the degree to which a device resists damage from dropping on a solid surface.
- **Water Resistant**: Water splashed against the device from any direction shall have no harmful effects.
Mag-Lite Torches

Mag-Lite ML125 Rechargeable

- Fully rechargeable LED torch
- Dual power option: NiMH battery (supplied) or 3 x C cell alkaline batteries
- 5 available functions: Full power (100%), Power Save (25%), Strobe (12 pulses/second), SOS (Int'l Morse Code), Momentary on/off
- Rugged, aircraft aluminium construction
- Spot to flood powerful LED beam
- Individually serial numbered
- Recessed, pushbutton, 3-position
- Self-cleaning switch
- Water & Shock resistant
- Anodised inside and outside for corrosion resistance and durability
- Dimensions: 28 x 31mm
- Weight (with batteries): 522g
- Supplied with NiMH battery

Mag-Lite MagCharger

- When it comes to quality, innovation and proven reliability,
- Nothing performs like a genuine Mag-Lite
- Precision machined high strength aluminium case with knurled design
- This masterpiece of engineering features a battery pack rechargeable up to 1000 times
- A state of the art electro formed reflector
- An incredibly bright, high intensity halogen lamp
- Includes solid-state electronics throughout and adapters for both home and car
- Linear focusing - spot to flood beam
- Water & shock resistant - 10 year warranty
- Individually serial numbered
- Rechargeable battery pack included
- 12v lead and UK 240v charger supplied
- Anodised inside and outside for corrosion resistance and durability

Mag-Lite LED Torch

- A range of high performance LED torches
- A more powerful projecting LED beam that focuses simply by rotating the head
- Balanced Optics, combining a highly refined reflector with a quality LED, for a brilliant adjustable beam
- Intelligent Energy Source Management (patent pending) balancing high brightness with extended battery life
- Interchangeable Light Sourcing - Use either the installed LED module or the Krypton lamp (stored in the tailcap)
- Anodised inside and outside for corrosion resistance and durability
- PLUS: All of the quality features you expect from a Mag-Lite torch

Hot Meal Kits

The Hot Meal Kit has been specially developed to allow you to eat on the go or when there are no cooking facilities available.

- This is simple and effective to use.
- Place the sealed food pouch in with the Flameless Ration Heater, add a small amount of water and then watch the chemical reaction heat the food in minutes.
- We’ve also included a spoon and a wet wipe to complete the kit.
- Ideal for using on night shifts, remote locations, on expeditions, music festivals or any emergency situation.

Is SP Part of your MAJAX Plan?

- SP Services is an international supplier of medical, first aid, ambulance, paramedic and emergency rescue equipment. We pride ourselves on our high level of service and this has not gone unnoticed by many of the major disaster relief organisations including the United Nations and the World Health Organisation. This has resulted in SP products being put to good use in the following areas:

Earthquake disaster zones
Medical treatment of refugees
Avian/Swine Flu outbreaks
Treatment of landmine victims
Terrorist attacks

- Here are just some of the reasons why SP are so successful and continue growing in both size and stature.
- SP offer a 24 hour/7 day a week/365 days a year emergency hotline
- SP has 36,000 ft² warehousing facilities with over £1,000,000 worth of stock and over 10,000 products
- SP has 24 Hour ordering facilities via fax and internet
- SP offers professional advice from experienced paramedic and first aid professionals
- SP will allocate an experienced account manager to oversee your order from placement to delivery
- SP offers low cost overnight delivery throughout mainland Britain - year round
- SP can deliver same day within mainland Britain
- SP can deliver worldwide
- SP accept payment by all major credit cards and will open accounts for established organisations

Ambu Manikins

**IV Training Arm**

- Designed with absolute realism in mind
- Life-like latex skin, 3 veins and 1 artery
- Realistic wrist rotation, extension and shoulder pivot
- Complete with infusion stand, dye and talcum powder

**Code** | **Item** | **Price**  
--- | --- | ---  
TR/751 | IV Training Arm with Spare Veins & Skin | £395.00  
TR/752 | Replacement Vein for Ambu IV Arm | £49.95  
TR/753 | Replacement Skin for Ambu IV Arm | £54.95  
TR/754 | Red Dye Concentrate for Ambu IV Arm | £12.95  

**Intubation Trainer**

- Realistic mouth, nostrils, teeth, tongue, pharynx, larynx, epiglottis, vocal chords, trachea, oesophagus and lungs
- Anatomically correct construction permits jaw thrust
- Open left side allows control of the trainee’s technique
- Ideal for practicing clearing of oral and pharyngeal cavities and trachea by suction
- Stomach alarm warns of improper tube placement
- Teeth alarm warns of excessive pressure
- Can be used with virtually all oral and nasal intubation devices
- Two convenient drawers for accessories
- Lightweight aluminium base and removable skin

**Code** | **Item** | **Price**  
--- | --- | ---  
TR/741 | Intubation Trainer | £790.00  

**Airway Man Trainer**

- Advanced instruction and training manikin for the simulation of realistic and correct anatomical and physiological conditions during cardiopulmonary resuscitation and resuscitator ventilation
- Can be used for insertion of different airway management devices
- Provides an exceptionally lifelike representation of the human anatomy, particularly of those features important to training in modern resuscitation techniques
- Built-in instrumentation shows the effectiveness of the resuscitation including results achieved for insufflation volume and depth of external chest compression and indicates any stomach inflation and incorrect hand positioning
- Does not need cables or wires, which means it can be placed away from computers and power supplies providing a great amount of freedom while training and because there are no wires or cables lying around it gives an even more realistic scenario

**Code** | **Item** | **Price**  
--- | --- | ---  
TR/745 | Airway Man Trainer | £2295.00  

**Cardiac Care Trainer**

- An advanced instruction and training manikin that has been designed for training Advanced Life Support in ACLS (Advanced Cardiac Life Support) algorithms and teamwork, either indoors or on location in field situations
- Wireless PC connection is possible allowing the Ambu CPR Software Kit to be connected
- Modular expandability means you can invest gradually, updating the system as you go
- Compatible with Combitube, Laryngeal Mask Airway oropharyngeal airways and traditional E.T. tubes
- The ECG box simulates as many as 26 rhythms and 2 artefacts giving a wide range of ECG options
- The ECG Box has two optional power sources: an internal battery pack, or an external 9V adapter

**Code** | **Item** | **Price**  
--- | --- | ---  
TR/771 | Cardiac Care Trainer - W Wireless | £3947.50

Prices exclude VAT and Carriage - Standard terms and conditions apply
Ambu Man - Model W + I

- New wireless connectivity
- The AmbuMan W (Wireless) does not need cables and wires, which means it can be placed in realistic surroundings away from computers and power supplies
- AmbuMan W models are equipped with a mechanical monitoring instrument as well as digital sensors showing effectiveness of the resuscitation
- The AmbuMan I (Instrument) models are equipped with a mechanical monitoring instrument showing effectiveness of the resuscitation, including results achieved for ventilation volume and depth of external chest compression
- Pulse is activated in the neck by chest compression and can be activated manually by instructor
- Adjustable neck stiffness and realistic exhalation
- Adjustable chest stiffness allowing students to train on different body builds
- Ambu hygienic system protects against cross infection
- Complete with carrying bag/training mat

Ambu Baby

- Lifelike natural nose & mouth exhalation
- Realistic anatomy for location of compression point
- Airway opens only when head is correctly positioned
- Foreign body/airway obstruction control
- Adjustable neck stiffness and realistic exhalation

ASK THE EXPERT

We stock a lot more manikins than shown in this catalogue. If you are not sure which manikin will meet your requirements, one of our team of paramedic and ambulance experts will be happy to advise you.

expert@spservices.co.uk
Rescue Randy

- Developed especially for lifelike handling, transport and extrication
- Made from durable vinyl with plastic coated cables tested to 1900kg
- Features fully articulated joints
- Ideal for situations too hazardous for volunteers
- Dimensions: 5’5” tall

A.L.S Manikin

- Includes oral and nasal airways for intubation, BVM ventilation, delivery of supplementary oxygen
- Allows for basic ABC assessment
- Intra muscular injection site
- Intravenous access sites in hand and arm
- Allows BP, ECG measurement and defibrillation
- Comes complete with carry bag

Truma Moulage Kit

- Sucking chest wound
- Abdominal wound with protruding intestines
- Compound fractures of humerus, femur & tibia
- Crushed foot and impalement of the lower leg
- Laceration of the forehead
- Projectile entry and exit of the arm
- Broken clavicle with seat belt contusion

Paediatric A.L.S Manikin

- Allows BVM ventilation, oral & nasal intubation, three lead ECG monitoring and external chest compression
- IV sites in hand and arm and intraosseous sites in both legs
- Scalp vein for palpation, cranial sutures and fontanels
- Arrhythmia training model also available

Juvenile Rescue Manikin

- Juvenile manikin
- 122cm tall, 7.3kg,
- 7-8 year old Helps to train for the emotional impact of child rescue

Choking Manikin

- Life sized adult upper torso
- Ideal for realistic blocked airway training/practice
- Open oral cavity, ribs and anatomical features
- Object expelled when correct technique is applied

Full Body CPR Manikin

- These life size models simulate the weight and resilience of the human body
- Much more robust than CPR and other training dolls and are undamaged by complete immersion in water
- Flexible joints allow the model to sit, lie, curl up or flex to suit the particular training situation.
- 1.65 metre tall
- The feet, hands and face are modelled for realism
- Valved airway only opens when head is extended

Water Rescue Manikin

- Specifically modified for fast equilibrium
- Easily drained when removed from the water
- Manikins float with the face above the water
- Extra weight can be placed in the abdominal area

Brad - B.L.S Manikin

- A very economical CPR training manikin
- Constructed of soft realistic feeling vinyl plastic over polyurethane foam
- Realistic head tilt and chin thrust for opening the airway
- Shows all of the necessary anatomical land marks
Stat Man

- Simulaids introduces the STAT Man. The new 6’1” body demonstrates a giant step forward in manikin design. Joint range of motion is near human and pinching in jointed areas is a lost art. Rib cage motion mimics lifelike respirations. Multiple pulse points demonstrate blood pressure variations.
- Product includes packages of replacement parts, sweat suit with logo, accessories and comes in a hard storage case with wheels.
- PDA STAT manikin is intended to be used for training of emergency medical personnel. All levels of EMS training can be administered to this manikin, including: physicians, nurses, ALS and BLS.
- STAT Manikin dimensions
  - Size: 185.4 x 86.4 x 30.5cm
- Intubation
- Multiple injection sites
- 4-lead monitoring
- Chest tubes
- IV arm therapy Defibrillation
- Arrhythmia training
- Bilateral pneumothorax relief
- Bilateral chest tube placement with simulated fluid discharge

Deluxe IV Training Arm

- Gives unlimited access to the major veins in the arm and hand
- Antecubital, basilic and cephalic sites, coupled with the dorsal metacarpal veins, allow students to practice various area skills all on the same arm
- IM site contains a foam pad designed to be squeezed out and dried to facilitate multiple uses
- Unit includes blood reservoirs and a supply of blood
- Skin, veins and injection site can be easily replaced in the field

<table>

Life/Form Intraosseous Infusion Simulator

- Designed to demonstrate and simulate the intraosseous infusion procedure
- Replacement bones and skins extend the product life indefinitely
- Features palpable landmarks, tibial access sites in both legs and aspiration of blood
- Simulator represents a six month old infant
- Includes:
  - 10 Replaceable Bone Inserts
  - 2 Sets Of Replaceable Leg Skins
  - 2 Two White Towelettes
  - 1 Syringe With Tubing
  - 1 Blood Powder
  - 1 Sealing Wax
  - 1/2 Oz. Liquid Lubricant
  - 1 Mixing Bottle
  - 1 Needle
  - 1 Hard Carry Case

**IV Training Arm**

- Allows detailed exercises in cannulation
- Students can perfect their technique
- Blood can be withdrawn or fluid injected
- Life-like skin and veins - characteristic “pop” can be felt when the needle penetrates the vein
- Durable skin roll over allowing repeated use and palpation for vein location
- Carry tray and blood included

The TruCorp Truman Trauma System, designed for teaching medical professionals the necessary skills for dealing with a range of life threatening trauma situations
An anatomically correct simulated human torso together with the renowned AirSim head for training the full range of airway management and resuscitation skills
The Truman Trauma System features replaceable tissues which help provide each trainee a lifelike and unique surgical experience.

Ideal for training in
• Chest tube insertion: recognition of correct position, surgical incision, blunt dissection through chest wall, perforation of pleura and finger sweep
• Needle Decompression of tension pneumothorax
• Cardio Pulmonary Resuscitation (CPR)
• Airway Management Skills
• Identification of tracheal deviation and jugular vein distension which are warning signs attributed to tension pneumothorax

TruCorp AirSim Standard
• Novel neck construction allows the head to be moved and secured in a number of positions. This ranges from the standard “sniffing” position to more difficult scenarios
• The uniquely constructed AirSim airway, designed to provide true, anatomically correct and visually accurate internal features
• An inflatable tongue with real-life size and texture

TruCorp AirSim Multi
• Uniquely constructed to allow realistic feedback during airway management procedures and provides true, anatomically correct and visually accurate internal features
• The addition of a nasal passage and chin facilitates training in nasal intubation procedures as well as bag and mask ventilation techniques
• The AirSim Advance features the uniquely constructed AirSim airway, designed to provide true, anatomically correct and visually accurate internal features to allow for airway management techniques.

• The addition of a “real-feel” skin covering provides a more realistic bag mask ventilation training, allowing for accurate articulation.

• The AirSim airway providing realistic feedback during airway management procedures.

• Real feel skin covering for added realism.

• A nasal passage which has been developed in a manner similar to the AirSim airway. Providing an anatomically correct nasal cavity, important landmarks such as the turbinates are clearly defined.

• An inflatable tongue with real-life size and texture.

• The TruCorp AirSim Baby, based on a 0-6 month old provides a realistic and anatomically correct paediatric manikin for airway management training.

• Realistic feedback during airway management procedures including bag/mask ventilation, supraglottic airway insertion, both naso and oetroacheal intubation.

• Realistic external and internal anatomical features allow for easy and successful demonstration of all paediatric videolaryngoscopes.

<table>

• Wrap around replaceable neck skin which facilitates up to 20 incisions thus improving efficiency.

• Optional subcutaneous fat tissue to demonstrate more difficult tracheostomy and cricothyroidotomy procedures.

• Realistic features which include: palpable cricoid landmarks, laryngeal cartilages and tracheal rings to provide positive user feedback and easy identification of the sternal notch.

• The ‘AirSim’ airway which provides realistic feedback during airway management procedures.

• A nasal passage which has been developed in a manner similar to the AirSim airway. Providing an anatomically correct nasal cavity, important landmarks such as the turbinates are clearly defined.

• An inflatable tongue with real-life size and texture.

• ‘Real feel’ skin covering for added realism.

</table>

• The TruCorp AirSim Child, which has been developed in conjunction with the Children’s Hospital Los Angeles is based on true CT data.

• This anatomically correct 6 year old has both realistic and anatomical features, perfect for practising basic paediatric airway management skills.

• The AirSim Child provides realistic feedback during airway management procedures including bag/mask ventilation, supraglottic airway insertion, both naso and oetroacheal intubation.

• Realistic external and internal anatomical features allow for easy and successful demonstration of all paediatric videolaryngoscopes.

• A tongue bulb to illustrate tongue edema.

• Missing frontal teeth to illustrate realistic dentals of a six year old.

• ‘Real feel’ skin covering for added realism.

• This model is ideal for a range of training including: Double naso-tracheal intubation. Bag and Mask ventilation techniques. Full range of supraglottic devices. Direct and video laryngoscopy. Endotracheal tube insertion.

Prestan Professional Manikins

The future of CPR/AED training manikins!

Realistic to the eye and the touch, the Prestan Adult Professional Manikin is unlike any other on the market. Available individually or in convenient multipacks of four for class training purposes, Prestan manikins are uniquely designed as a clamshell that accommodates an easy-to-insert face shield/lung bag.

Prestan’s revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

With their patented face/head tilt, the Prestan Professional Adult Manikin simulates the way an actual patient’s head would move if they required CPR. In addition, the unique construction of their manikins incorporates a clicking mechanism to help them use the correct force to compress the chest to the correct depth.

Prestan Manikin Family Pack
2 x Adult, 2 x Infant, 1 x Child

- Realistic looking adult, infant and child versions of the Prestan Professional Manikin in a carry bag
- Allows each student to observe a true chest rise
- Face shield is secured so it won’t slip
- Easy-to-insert face shield lung bag speeds setup of the manikin
- Gives each student a realistic experience
- Full chest rise and lung bag ensures that students receive the most accurate and realistic training
- Helps students take the CPR learning experience seriously
- Clicker mechanism in order to ensure students are giving adequate chest compressions
- Head/tilt chin lift in order to teach students how to open an airway
- Includes CPR LED Monitor

Prestan Professional Manikin Family Pack Includes:
- 2 x Adult Manikins with CPR Monitor
- 1 x Child Manikin with CPR Monitor
- 2 x Infant Manikins with CPR Monitor
- 20 x Adult Face-Shield Lung Bags
- 10 x Child Face-Shield Lung Bags
- 20 x Infant Face-Shield Lung Bags
- 1x Instruction Sheet and Nylon Carrying Case

FULL RANGE OF SPARES AVAILABLE FOR EACH KIT

Training
Flexible Spine with Ribcage and Spine

- Lifesize flexible spine with ribcage
- Shows the interaction of the ribs, spine and associated structures
- Full male pelvis and occipital plate
- Extremely good value and durable
- Fully flexible mounting
- L3-L4 disc prolapsed
- Spinal nerve exits
- Cervical vertebral artery
- Articulated femur ends
- Cervical, brachial, lumbar & sacral plexi nerves
- Stand included

Lifting Manikin Model

- Illustrates effects of bad lifting technique on the spine
- The figure raises a weight from 2 marked positions, if the correct position is used the spine is not distorted
- Base incorporates illustrations of effects on the spine
- Comes with a background booklet
- Dimensions: 41 x 23 x 13.4cm when upright

Two Lumbar Vertebrae with Nerves & Discs

- Supplied with 2 interchangeable discs, two herniated; 1 lateral and 1 dorsal
- Mounted on a stand - size 12 x 12 x 12cm
- Dissectible into 6 parts

Vertebrae Set

- Comprises atlas, axis, 1 cervical, 2 thoracic with inter-vertebral discs & a lumbar vertebrae
- Mounted on a stand
- Dimensions: 12 x 12 x 22cm
- The articulating surfaces are colour coded

Prices exclude VAT and Carriage - Standard terms and conditions apply
Skeleton Model with Muscles and Ligaments

- Over 600 hand-numbered, labeled details
- Hand-painted muscle origins and insertions
- Flexible spine and ligaments
- Slipped disc between the 3rd & 4th lumbar vertebrae
- Protruding spinal nerves and vertebral arteries
- 3-part assembled skull with inserted teeth
- Made from durable, unbreakable synthetic material
- Top quality, life size natural casting
- Close to the realistic weight of around 200 bones
- Final assembly carried out by hand
- On a stable metal stand with 5 casters (painted white)
- Can be removed from stand
- Full flexibility of limbs on left side, right side has full flexibility of knee and hip with limited flexibility of elbow and shoulder

A Comprehensive Guide to First Aid

- This DVD covers the latest protocol and techniques in a clear step by step guide
- Combines video, demonstrations, presentations, voice over, text and high quality graphics
- Designed to give you the knowledge and importantly, the confidence to act in a first aid situation
- Brings the training to life with a number of scenario based videos
- Published 2011, 100 minutes run time

Emergency Paediatric Care
The Practical Approach

- A valuable resource to all who are dealing with this element of paediatric life support, this must have CD Rom covers emergencies relevant in both rich and poor countries

Anatomy Trainer

- A comprehensive anatomical CD with a unique customisable parameters quiz function
- Instantaneous and systematic analysis of quiz results
- Over 400 high resolution images and nearly 3000 exam relevant anatomical structures

Driver Training

- The Roadcraft DVD tracks police officers on an advanced driving course at the Metropolitan Police Motor Driving School, including skid pan manoeuvres, night & motorway driving
- Complementing Roadcraft handbook and Motorcycle handbook are also available

Mosby’s Human Anatomy Through Dissection Series

- These four instructional DVD’s detail human anatomy and traumatic injuries through the use of human dissection
- Each DVD covers a specific area of the body
- 4 DVDs available separately or as a set
- DVD 1 - Head and Neck Anatomy
- DVD 2 - Chest Anatomy
- DVD 3 - Abdomen and Pelvis Anatomy
- DVD 4 - Limb Anatomy
The Act+Fast Anti Choking Trainer is worn by students in CPR class to learn the Abdominal Thrust Manoeuvre (Heimlich).

When performed correctly, a foam plug shoots into the air, making instruction realistic and leaving students confident.

The Act+Fast Red Trainer also includes a foam back slap pad to allow students to practice backslaps as recommended by the UK Resuscitation Council and practice choking rescue protocols as indicated by the American Red Cross and European Resuscitation Council.

Supplied with BackPad, Carry Bag and 10 Spare Plugs

Emergency Response Drivers Handbook

• The Second Edition of this important book on emergency driving in the ambulance service has been completely revised and updated
• An essential resource for those either involved in the delivery of ambulance driver training or who are about to undertake an Ambulance Service emergency response driver training course
• Written by the staff who developed the most recent national driver training standards
• Provides a summary of the standards and practices expected of a driver of an ambulance service vehicle, for both emergency and non-emergency use.
• Designed so that it can be used for self-study, either before or during a course, this handbook is also ideal as a ready reference afterwards in order to maintain skill levels
• Replaces the IHCD Ambulance Service Driver Training Manual

JRCALC / UK Ambulance Services
Clinical Practice Guidelines 2016

- The 2016 Clinical Practice Guidelines provide guidance for NHS paramedics; although the principles are applicable to the work of all pre-hospital clinicians.

- The guidelines have evolved from locally-derived guidance (mainly developed using non-systematic approaches) to systematically-developed national clinical practice guidelines developed to universally agreed standards based on current best evidence.

- Reviewed on a five year cycle and developed or updated, based on systematic reviews of the evidence and consensus agreement giving you piece of mind you have the most up to date guidelines.

- The guidelines are an important part of clinical risk management and ensure uniformity in the delivery of high quality patient care and as such, they form the basis for UK paramedic practice, training and education.

- Also available in pocket book format, providing the guidelines in a portable format for vital reference on the move.

PHTLS: Prehospital Trauma Life Support, Eighth Edition is the next step in the evolution of the premier global prehospital trauma education program. For three decades, PHTLS has improved the quality of trauma patient care and has saved lives. The Eighth Edition of PHTLS continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education.

This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, state-of-the-art knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a good foundation of knowledge and key principles. The Eighth Edition of PHTLS features a new chapter, Physiology of Life and Death. This chapter creates a solid understanding of the physiology of life and pathophysiology that can lead to death. This understanding is essential for the prehospital care provider if abnormalities are to be found and addressed quickly in the trauma patient.

- **Clear Approach to Assessing a Trauma Patient**
  - In the field, seconds count. PHTLS teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination.

- **Dynamic Technology Solutions**
  - World-class content joins instructionally sound design in a user-friendly online interface to give instructors and students a truly interactive and engaging learning experience with:
    - eBook
    - Video Demonstrations of Critical Skills
    - Interactive Lectures
  
  - Published in November 2014 with 736 pages, paperback

Nancy Caroline’s Emergency Care in the Streets - UK 7th Ed

- The next step in the evolution of the premier paramedic education program
- Referenced, evidence based and in line with the new 2013 UK Ambulance Services Clinical Practice Guidelines this is the definitive textbook for paramedics in the UK
- This legendary paramedic textbook was first developed by Dr. Nancy Caroline in the early 1970s and transformed paramedic education, today the College of Paramedics and the American Academy of Orthopaedic Surgeons are proud to continue this legacy and set the new gold standard for the paramedics of tomorrow
- This is the ideal guide for UK paramedics teaching and learning life-saving responses in emergency conditions and an essential guide for those preparing for certification or recertification
- Features the clear, fun, understandable writing style for which Dr. Caroline was known
- A mixture of text, colour photographs, diagrams and cartoons to suit all learning styles
- Skill drills with written step-by-step explanations and visual summaries of important skills and procedures
- A full suite of instructor, student and technology support materials will also be available
- 7th edition published in April 2013 with 1680 pages, hardback

Pain: An Ambulance Perspective

- An introduction to pain and its pathophysiology
- Designed to introduce themes and encourage discussion amongst prehospital ambulance staff, thereby keeping pain management
- In the forefront of assessment and treatment within the ever-evolving field of prehospital care
- A range of assessment tools for adults and children
- Pain relief available to specialist paramedics
- Summaries for each chapter
- Published January 2012 with 134 pages, paperback

Handbook of Pre-Hospital Care

- Authoritative, evidence-based advice on the assessment and management of pre-hospital care emergencies
- Designed to provide information for all immediate care practitioners including doctors, paramedics, emergency care practitioners, nurses and voluntary aid society members
- Each section defines the important clinical features of the named condition
- Includes boxes containing essential advice
- Incorporates national and international guidelines and protocols and reflects contemporary best practice
- Published in 2007 with 824 pages, PVC soft cover

Assessment Skills for Paramedics

- This handy pocket sized book can be used by students for exam revision or by paramedics en-route to a call, to revisit key points and further refine their skills
- Includes specific chapters in the specialist fields of paediatric assessment and neonatal assessment
- Written by experienced paramedics, specialist health care professionals and doctors
- Published January 2012 with 134 pages, paperback

Foundations for Paramedic Practice

- Ethics and law for the paramedic
- Reflective practice and communication
- Professional issues, including clinical audit, governance and anti-discriminatory practice
- Psychological perspectives on health and ill health
- Safeguarding children
- Sociological perspective on health, ill health and social policy
- Managing change, decision making and leadership theory

Paramedics: From Street to Emergency Department Case Book

- This accessible book will help both practising and student paramedics prepare to deal with 25 of the most commonly seen pre-hospital care scenarios, as well as to revise for practical exams
- Written by a unique father and daughter author team, with the complementary perspectives of a paramedic educator and a student
- Covers a wide range of scenarios, from everyday to complex
- Contains practical cases, checklists, clinical tools, key information boxes and clear answers to clinical questions
- Published February 2012 with 176 pages, paperback

The Paramedic’s Guide to Research: An Introduction

- A no nonsense guide for student and qualified paramedics looking to understand the key elements of research and what it means for their profession
- Explains key concepts and methodologies to help you get to grips with the nature of paramedic research and how it works in practice
- Paramedic research is placed firmly in the context of clinical practice drawing on a wealth of cases and examples
- Published November 2011 with 184 pages, paperback

Prices exclude VAT and Carriage - Standard terms and conditions apply
**Fundamentals of Paramedic Practice**

- An essential text for the aspiring student paramedic
- Fundamentals of Paramedic Practice makes paramedic science and pre-hospital care accessible, straightforward and exciting
- It assumes no prior knowledge of the subject, presenting the must-have information that students need about both the theory and practice of what it means to be a paramedic
- With extensive full-colour illustrations throughout, as well as activities and scenarios, this user-friendly textbook will support paramedic students throughout their course
- Published in 2015 with 592 pages, paperback

**Manual of Clinical Paramedic Procedures**

- Clinical procedures are a fundamental aspect of care for practitioners working in pre-hospital settings
- The Manual of Clinical Paramedic Procedures is written specifically to support the practice of paramedics, ambulance technicians, first responders and volunteer ambulance personnel
- Published in 2010 with 392 pages, paperback

**Airway Management: Paramedic**

- Airway management and ventilation are the highest priorities in patient management
- This is a comprehensive stand-alone program, which meets and exceeds the airway management objectives as outlined in the 1998 U.S. Department of Transportation Paramedic National Standard Curriculum
- Written by a paramedic for paramedics, this book uses a case-based approach to help future paramedics develop analytical skills while learning the content of airway management
- Published in August 2011 with 32 pages, paperback

**How 2 Become a Paramedic**

- Completing the paramedic application form to ensure success
- Sample application form responses that have actually been successful
- The Top 10 Insider Tips and advice brought to you by serving recruitment staff
- How you can easily beat the competition to land a job
- The criteria for joining the Ambulance Service
- How to prepare for the assessment centre and test questions
- How to answer the interview questions including sample responses to use
- How to pass the lifting and handling tests

**Prices**

- Prices exclude VAT and Carriage
- Standard terms and conditions apply
**EMS Field Guide BLS Version**
- 8th edition including the latest AHA 2010 updates
- Includes features on EMS protocols, spell checking, EKGS, defibrillation, home medications and much, much more
- At only (7.5 x 12.7cm) it easily fits in your pocket
- Colour-coded tabs
- Waterproof, alcohol-fast and durable
- Revised 8th edition published in 2012 with 92 pages, spiralbound, paperback

**EMS Field Guide ALS Version**
- The EMS Field Guide: ALS version makes it easy for Paramedics, Nurses and Physicians to look up their patients’ medications, check drug doses, quickly interpret 12-Lead EKGS and much more!
- At only (7.5 x 12.7cm) it easily fits in your pocket
- Colour-coded tabs
- Waterproof, alcohol-fast and durable
- Updated with the new 2010 CPR and ACLS algorithms from the AHA

**AAOS Paramedic Field Guide**
- This full-colour, spiralbound field guide contains a wealth of information that paramedics need at their fingertips
- Paramedics will be able to confirm appropriate paediatric ET tube sizes, emergency measures in the event of an infectious exposure, signs and symptoms of acute illnesses, conditions that warrant supplemental oxygen administration, fracture classifications, based on displacement and much more
- Published in 2008 with 352 pages, spiralbound, paperback

**Rapid Paramedic**
- Reflecting the 2010 ECC Care guidelines, RAPID Paramedic, 2nd edition provides useful, quick-reference information to students and practicing paramedics
- Perfect for the classroom and the field
- Coloured tabs separate and identify each section so readers can quickly locate information in an emergency
- Includes dose calculation formulas, management algorithms, spinal injury decision tree and much more
- Full colour illustrations throughout
- Cleverly formatted for quick reference during an EMS call
- Published in March 2012 with 240 pages, paperback

**Rapid Transport of the Critical Care Patient**
- Ideal for use in the field or in the classroom
- This full-colour guide is pocket sized, spiral bound and water and stain-resistant
- Essential information includes ventilation and RSI, intraaortic balloon pump usage, pharmacologic management guidelines, neurologic assessment and management tools, paediatric assessment tools, trauma assessment, drug calculation formulas and much more.
- Whether you’re a critical care paramedic, flight nurse or critical care nurse, you will use this guide again and again
- Published March 2011 with 160 pages, paperback

**Rapid First Responder**
- Perfect for the classroom or the field, this handy pocket guide is full of essential information in a convenient, quick-access format. Plenty of quick-reference tables, CPR and AED information, airway management and breathing skills and much more
- Spiral bound, fluid resistant and pocket sized format makes this reference durable enough for rough clinical use
- Colour tabs for each section enable you to find the information you need quickly
- At-a-glance tables, charts and algorithms highlight important content and make it easy to find information when you need it most
- Revised 2nd edition published in 2011 with 160 pages, paperback

- Published in 2007 with 118 A4 full colour, spiral bound pages

ECG for Paramedics

- A self-contained guide to taking, reading and analysing ECGs, defibrillation and paramedic interventions
- Written in Dolphin’s easy to follow style and clear concise format
- Published in 2007 with 110 A4 full colour, spiral bound pages

Prices exclude VAT and Carriage - Standard terms and conditions apply
Handbook of Pre-Hospital Care

- Authoritative, evidence-based advice on the assessment and management of pre-hospital care emergencies
- Each section defines the important clinical features of the named condition
- Includes boxes containing essential advice
- Incorporates national and international guidelines and protocols and reflects contemporary best practice
- Published in 2007 with 732 pages, PVC soft cover

Handbook of Emergency Medicine

- An essential guide for working in an A&E department
- Concise practical information
- Written and reviewed by experts, this handbook will ensure you are up-to-date and have the confidence to deal with all emergency presentations, practices, and procedures
- A vital companion for both study and practice
- Will also appeal to paramedics & pre hospital physicians
- Published in Feb 2012 with 768 pages, PVC soft cover

Handbook of General Practice

- New 4th edition, an essential pocket guide for (training) GPs
- Written by GPs for GPs about general practice in the real world
- Extensive coverage of evidence-based clinical practice
- Covers everything in the curriculum and much more
- Published in March 2014 with 1200 pages, PVC soft cover

Handbook of Clinical Medicine

- Detailed practical & authoritative
- Brand new design with integrated full colour pictures
- Covers new information on consent and common calls
- An ideal reference in the ward, clinic or at the bedside
Mosby’s Dictionary of Medicine, Nursing and Health Professions

- A UK edition of this popular reference work, uses English spelling and terminology and metric measurements
- Medical, nursing, allied health and complementary therapy terms are included and appendices cover UK guidelines, bodies and organisations
- Full-colour illustrations and clinical photograph sections for easy identification of conditions
- Website with colour illustrations, with and without labels, for self-testing, clinical photographs in full colour, a downloadable spellchecker, ‘Word of the Day’ and useful weblinks
- Metric measurement system
- Published in 2010 with 960 pages, hardback

Nurse’s Dictionary

- Includes entries that address the changing world of nursing and healthcare services
- Is firmly focused on the needs of today’s nurses and healthcare practitioners
- Packed with useful information, it provides the essential pocket reference resource

Dictionary of Nursing

- 19th edition of the unique nursing-focused reference source
- More in depth entries on key nursing issues
- Improved layout and usability including improved artwork
- Published in May 2006 with 304 pages, paperback

- The world’s most widely used medical reference
- Updated to reflect the latest medical advances
- Packed with essential information on diagnosing and treating medical disorders to help deliver the best patient care
- “Professional Edition” Ideal for medical students, postgraduate doctors, pharmacy, nursing, physio, occupational therapy and students of allied health professions
- Complete and comprehensive in all areas of medicine
- Published in September 2011 with 3754 pages, hardback
### Anatomy and Physiology Colouring & Workbook
- Ross & Wilson’s A&P study guide and colouring workbook
- High quality illustrations with a variety of exercises
- Latest 3rd edition
- Published in June 2010 with 344 pages, paperback

#### Price
- Code: BO/010
- Item: Anatomy & Physiology Colouring & Workbook
- Price: £19.99

### Anatomy & Physiology for the Prehospital Provider
- Provides an overview of the basic systems of the human body and then explores each system in detail chapter by chapter
- Delivers a thorough discussion on the system’s anatomy, physiology, and pathophysiology
- This text presents both the gross anatomy and the microscopic anatomy of vital structures
- 2nd Edition published in May 2014 with 500 pages, paperback

#### Price
- Code: BO/020
- Item: Anatomy and Physiology for the Prehospital Provider
- Price: £59.99

### Principles of Anatomy and Physiology
- The thirteenth edition of the phenomenally successful Principles of Anatomy and Physiology continues to set the standard for the discipline
- Superb balance between structure and function and continue to emphasize the correlations between normal physiology and pathophysiology, normal anatomy and pathology, and homeostasis and homeostatic imbalances

#### Price
- Code: BO/016
- Price: £55.99

### Anatomy & Physiology Made Easy
- Fully revised so that it covers all relevant areas and is placed firmly in the UK context for education and practice
- Provides a thorough grounding for the essentials of biomedical science prescribed by the NMC and universities
- Essential reading for nursing students

#### Price
- Code: BO/006
- Item: Anatomy & Physiology Made Incredibly Easy
- Price: £25.50

### Anatomy & Physiology in Health and Illness
- Ross and Wilson is unique among textbooks of anatomy and physiology in its appeal to a wide range of healthcare professionals including nurses, nursing students, students in the allied health professions and complementary / alternative medicine, paramedics and ambulance technicians.
- A “first choice” textbook for the majority of students
- Lively and colourful page layout
- 12th Edition published in April 2014 with 528 pages, paperback

#### Price
- Code: BO/015
- Item: Anatomy & Physiology in Health and Illness
- Price: £31.99

### Anatomy & Physiology for Dummies
- Written so the reader can easily learn and remember names and terms and also understand how the human body works
- Includes a 16 page colour insert to help the reader see the big picture
- Dozens of drawings help illuminate anatomical features and functions

#### Price
- Code: BO/008
- Item: Anatomy & Physiology for Dummies
- Price: £16.99
Books - Paediatrics & Medical Gases

### Medical Gases
- Concise, yet comprehensive guide to Medical Gases, Oxygen and Entonox.
- Full colour illustrations and photographs throughout.
- Covers the respiratory system, oxygen, pulse oximetry, oxygen equipment, safety issues and more.
- Published in 2014 paperback.

### Oxygen Administration
- Integrated teaching and learning system.
- Step-by-step explanations and visual summaries of important skills.
- Current information and useful tips for those administering emergency oxygen.
- Published in January 2008 with 40 pages, paperback.

### ITLS Paediatric Provider Manual
- New 3rd edition written and updated by BTLS / ITLS expert.
- The book provides everything you need to know about running an ITLS Paediatric course from start to finish.
- All chapters have been revised and references updated, as have many photographs, charts and illustrations.
- 208 pages with illustrations and photos throughout.
- Published in 2009, paperback.

### Advanced Paediatric Life Support
- A complement to the Advanced Paediatric Life Support Course.
- Includes the latest International Liaison Committee on Resuscitation (ILCOR) 2010 Guidelines.
- The clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency.

### Rapid Paediatric Emergency Care
- Handy pocket sized, full-colour reference.
- Provides quick facts about paediatric emergency care that are vital to the clinical setting.
- Clinical information is broken down into charts, algorithms and tables to aid the user in providing safe and efficient care.
- Coloured tabs separate and identify each section so the user can quickly locate the necessary information in an emergency.
- Features alphabetical listings of medications commonly used in paediatric emergency care.
- Spiral binding allows book to lay flat.
- Published in July 2006 with 198 pages, paperback.

### Pre-Hospital Paediatric Life Support
- 2nd edition of the exceptionally well written PALS study guide.
- Written especially for pre-hospital staff.
- A complementary volume to the best-selling Advanced Paediatric Life Support.
- An excellent stand alone guide.
- Published in 2005 with 240 pages, ring-bound.

Aquatic Rescue and Safety

- Whether you are simply an avid boater or swimmer or a member of a water rescue team this book is ideal if you are responsible for the welfare of those who spend time in or around the water
- Written by a veteran scuba diving instructor and water-rescue instructor trainer, the book presents the latest, most effective rescue and first aid procedures
- Offers life saving techniques proven to save lives for all water-related injuries
- Published in 2003 with 623 pages, hardback

Oxford Handbook of Expedition and Wilderness Medicine

- A comprehensive guide to expedition medicine, covering planning, what to take, how to cope with emergencies and hazards of specific environments
- Provides practical advice which can be implemented in remote environments, with links and references for further information
- Written and edited by experienced expeditioners and suitable for doctors, paramedics and nurses
- Published in 2008 with 640 pages, paperback

The Ship Captain’s Medical Guide

- An official HMSO and MCA publication
- For use on ships where a doctor is unavailable
- Advice ranges from birth to death, general nursing hygiene and the prevention of disease
- Includes details of the current statutory Merchant Shipping Notice medical stores
- 232 pages with tables, graphs & line illustrations
- 22nd Edition published in 1999, hardback

Wilderness First Aid, Emergency Care for Remote Locations

- Developed by the American Academy of Orthopaedic Surgeons (AAOS) and the Wilderness Medical Society (WMS)
- Designed for those who work or travel in remote locations, this comprehensive training program will teach you what to look for and what to do in the event of an emergency and describe the most appropriate type of care
- New photographs, illustrations and step-by-step skill drills
- Treatment information is updated to meet current medical standards
- 3rd Edition published in 2008 with 300 pages, paperback
**Carry On Ambulance**

- True stories of ambulance service antics from the 1960s to the present day
- Over 100 stories, some of the most extraordinary, bizarre and comical moments of the past 50 years
- In the interests of all concerned, the names and locations have been altered to protect the guilty, but all the stories are true
- Published April 2012 with 220 pages, paperback

**Blood, Sweat & Tea**

- Blood, Sweat & Tea - Real Life Adventures in an Inner City Ambulance
- True accounts of what really happens inside an ambulance
- Award-winning writing is, by turn, moving, cynical, funny, heart-rending and compassionate
- From the tragic to the hilarious, from the heart warming to the terrifying
- Published in 2006 with 256 pages, paperback

**You Can’t Park There!**

- This is the first ever behind-the-scenes account of life on board an air ambulance, the UK’s first to carry a qualified trauma team
- Crammed full of unbelievable stories; it sees their helicopter take to the skies through thunderstorms, over dangerous mountain terrain and land everywhere from allotments to the middle of the M1 in a bid to save lives
- Published in June 2012 with 320 pages, paperback

**NEE NAW Real Life Dispatches from Ambulance Control**

- From taking the first calls after the terrorist attacks on 7th July 2005, to delivering a baby over the phone, whether helping the child whose mum has attempted suicide or dealing with the many regular callers - serial hoaxer The Banana Man, Sally the young alcoholic and Mad Brenda, each with their own surprising stories to tell -
- Suzi has heard it all Suzi Brent will make you laugh, she’ll make you cry, but never again will you dial 999 for a broken finger
- Published March 2010, 304 pages, paperback
citizenAID

Many people across the country have prepared themselves to know what to do when someone collapses with a heart attack. But being able to act effectively after serious injury from bomb blast, gunshot and stabbing requires different knowledge and skills. Quick actions in these situations, particularly to stop bleeding, will save lives.

The citizenAID Pocket Guide is a clear and simple series of immediate actions. YOU can be the person to provide information to the emergency services, to help organise others at the scene and to give life-saving care while waiting for the professionals to arrive.

citizenAID is grounded in deep and practical experience. The underpinning concepts have been tried and tested in numerous multiple casualty incidents involving blast and gunshot casualties during conflict. The treatment recommended reflects those skills that can be applied by people without medical training to save lives.

citizenAID Pocket Guide

- Clear and simple guide for immediate actions to help save lives from a major incident such as a shooting, stabbing or bombing.
- Helps organise others at the scene and give life-saving care.
- Developed with emergency services, cross-government agencies.
- Be prepared. Learn the system. YOU can save lives.

SP Standard Terms & Conditions

1. Acceptance of the goods by the Buyer indicates acceptance of the Terms and Conditions given below.

2. New credit accounts may be opened upon receipt of two satisfactory trade references and Bankers’ name and details.

3. Public and Government Authorities may be treated as account customers upon receipt of a written order, signed by a duly authorised officer. Voluntary Organisations must complete an “Account information form” to be signed by an authorised person.

4. Credit account payment must be made within 28 days of the Invoice Date unless otherwise agreed. Interest will be charged at 5% over base rate on all overdue amounts. The company reserves the right not to deliver if the Buyer’s account is overdue or credit unsatisfactory.

5. Risk in the Goods shall pass to the Buyer on delivery. The Title in the Goods shall not pass to the Buyer until payment has been made by the Buyer in full of all sums owing by the Buyer to SP Services.

6. All Goods remain the property of SP Services until payment is received in full. In the event of non-payment by the Buyer in accordance with the terms agreed, the Buyer hereby authorises SP Services to enter upon the Buyers’ premises to remove the goods.

7. Dates given by SP Services for the delivery of Goods are approximate only and do not form part of the Contract. SP Services accept no liability for any loss, consequential or otherwise, rising from the delay.

8. SP Services reserve the right to amend its prices without prior notice.

9. All prices quoted are exclusive of VAT and carriage, which will be charged at the current rate, where applicable.

10. Customers exempt from VAT under the zero rated schedule MUST supply a VAT Exemption Certificate with a written order, otherwise VAT will be charged and cannot be refunded by the Seller. Please note not all products are eligible for zero rating.

11. Under no circumstances will SP Services be liable for:
   (i) any goods considered damaged in transit unless such damage is reported to us within 48 hours of receipt of the goods.
   (ii) defects or damage resulting from fair wear and tear, neglect, improper use by the Buyer, or failure of the Buyer to comply with manufacturer’s instructions.
   (iii) goods which have been adjusted, altered, adapted or repaired.
   (iv) the suitability of any goods for any particular purpose or use whether or not the purpose or conditions were communicated to the Seller.

12. Any alleged defects must be notified by the Buyer to SP Services within 3 working days of delivery. Any defective goods should be held for inspection.

13. Complaints in respect of alleged defects will not be grounds for the Buyer to withhold payments, and give no right of set-off against payments due from the Buyer to SP Services.

14. Goods cannot be returned unless the Buyer has been issued with an official Goods Return Number. A minimum 10% re-stocking and administration charge may be applied to goods returned without authorisation.

15. Credit will not be issued for returned Goods, which, in the opinion of SP Services, are in an un-saleable condition. Goods must be returned unused and complete with original packing materials and instructions.

16. Goods of a type not normally held in stock, and therefore specially ordered, are non-returnable.

17. Medicinal or pharmaceutical goods are non-returnable.

18. Products may vary from those illustrated and are supplied un-kitted unless otherwise stated.

19. Bladed items: It is an offence for any person under the age of 18 to purchase knives or bladed items. SP Services will only supply bladed items to customers over the age of 18 years. SP Services may request proof of age before transactions including these products are processed. SP Services reserve the right to refuse sale to any customer who we believe to be under age or who may represent a threat to themselves or others.

* Price Match is subject to proof of the selling price on an identical product. SP Services reserve the right to retract the ‘Price Match’ offer without prior notice.

** Money back guarantee is only applicable on goods returned undamaged and in original packaging, unless the goods are faulty and covered under our 12 month warranty. Goods must be returned within 30 days from date of invoice, unless otherwise agreed in writing. Authorisation must first be obtained from SP Services before goods can be returned. Postage will not be refunded on goods returned which are not faulty.

*** The Company’s Policy is one of continuous development and the right is reserved to make changes without notice.

**** None of the Company’s employees or Agents have the authority to bind the company by an oral agreement at variance to these conditions of sale.

Every possible care has been taken to ensure the prices listed in this catalogue are correct as of the 01/02/17. Please contact customer services on 01952 288 999 for any changes to products or advertised prices that may have occurred after this date due to circumstances beyond SP’s control. E.& O.E
