

Syner-Med VeraTemp™ +

Professional Non-Contact Thermometer

The Syner-Med VeraTemp™+ Non-Contact Thermometer is the professional version of our innovative thermometry technology.

Designed for more durable use with a protective medical grade silicon cover and neck strap lanyard, the Syner-Med VeraTemp™+ is ideally suited for use in clinics, hospitals, emergency medical services, long-term care facilities, schools and other public settings. As Syner-Med VeraTemp™+ can read patients' temperatures without physical contact, the thermometer is hygienic easily wiped down and there is no need for expensive and wasteful probe covers.

Quick-Reference Guide

- Non-contact Infrared technology - No need to touch, startle, upset or wake a sick patient - completely touch free!
- Improved infection control, reduced cross contamination risk
- Proven accuracy to $\pm 0.2^{\circ}\text{C}$ – ASTM standard
- Hygienic and easy to use – clean with an alcohol wipe
- Instant reading at the click of a button, point and click 5-8cm from forehead
